

ANNOTATED BIBLIOGRAPHY

1. Toomela, A., 2018. Vygotskian (but only partly Vygotsky's) understanding of special education. 1st ed. [e-book] Tallinn: University, Estonia.

This e-book is about original Vygotsky's theory, it is easy written and explained. Also the source is reliable and credible University in Europe.

The e-book contains 12095 original words including citations, references, main body structure of the work and final notes. The author is a well-known in his society lecturer. Many people believe strongly on Vygotsky's theory of development, that is why we get so much material on study e-books.

I used this particular material, because of easy explained language on it. Could be used by parents to get more information on the theory and how that will help and support their child.

2. Bornstein., 2021. Human behavior - Piaget's theory. [online] Encyclopedia Britannica.

Piaget's theory described on Encyclopedia Britannica includes more than 19340 words and is one of the biggest among research and explanation the theory.

This information was used by me, because of the authentic material implemented in the study. Britannica is very reliable source when it comes to worldwide theory's and personalities

I used information on it for study purposes and for the task 1 on my curriculum. And again if parent or teacher need to engage with more information and knowledge to implement in daily basis learning abilities, that is a very good site information.

3. Sword, R. and Sword, R., 2021. Early Child Development | Stages & Characteristics. [online] The Hub | High Speed Training.

This study is for early stage behavior children, and was very useful tool for my task. It contains more than 1414 words including authors conclusions.

It's very well developed as a material and could be used as training course. The structure of my work very much depended on this material. I used as turning point to my slides and I think it helps me to understand the problematic stages on children development and further actions.

4. Allen, L., Kelly, B., Success, C., Board on Children, a., Medicine, I. and Council, N., 2021. Child Development and Early Learning.

This is a very big book of child's development and learning research. It has more than 46060 words, which is a lot to read.

The authors and the source are reliable and positive. Do recommend for reading, if the audience like to know more for the theory of mind among early ages of child life.

I used the book for my work because of the one chapter that explains general cognitive skills on children early age.

5. Team, V., 2021. Supporting Cognitive Development: Environments and Materials | VLS. [online] [Virtuallabschool.org](https://virtuallabschool.org).

This is an e-book make as tool for understanding teachers need to teach exactly how and what audience. It is made more for the environments of learning and teaching itself.

Was made from 3753 word, more like an essay format with guides. Again it is a god source of knowledge and popularity on the internet.

Was used by me for learning and understanding purposes, gave me the idea of how to put my vision to the slides I have created.

6. Team, W., 2020. Visual Learning Style and Strategies for Teachers. [online] Western Governors University.

This booklet is about visual learning style and how to teach early age kids. Very easy to read and understand. Very lite word count, around 1000 and written style is comfortable for anyone.

The source is university site for self-development and help on the topic. More like manual how to maintain and react on visual need of learning.

I used for my research because of its practicality and simplicity of understanding and implement.

7. Raising Children Network. 2020. Thinking and play: toddlers.

More like article style, but with very true tools given to the topic. Easy reading, fast understanding and moreover no more than 500 words material to except. How and why to play with toddlers, a truly guide to maintain.

Been written on easy language and comfort the ideal question topic.

I used because I like it, makes me feel prepare after reading and implementation part is easy.

8. Education, F., 2021. Games & Activities for Children Ages 6-10 (Fun, Educational & Thinking Skills) - Family Education

This book is about how to pick the right activity for young age kids, easy to prepare and fun when do it. Never the less family education has a huge impact on behavior and development to a child.

Like the source of information, very systematic and fun made info, basically it goes to every possible aspect of interaction on a fun and learning way.

Big and full of different text material guide, more than 10000 words count, and still fun to read.

Really useful tool for my work and not just me, any parent, teacher or child worker is available to read on implement.

9. Welsh Government, T., 2021. gov. welsh. Support for children and young people with vision impairment in educational settings, Available at: [ov.wales/sites/default/files/publications/2019-12/191209-support-for-children-and-young-people-with-vision-impairment-in-educational-settings.pdf](https://gov.wales/sites/default/files/publications/2019-12/191209-support-for-children-and-young-people-with-vision-impairment-in-educational-settings.pdf) [Accessed 19 October 2021].

It's about effective approach and support of children for education purpose. Like the idea of involving everyone in learning process:

Parent, teachers, special educators, head teachers, social workers and even the community to help needed learning and cognitive skills.

I didn't used in my work because of the short slide space, but still wanted to admire ideas and thoughts about learning for kids.

10.Sprouts. (2021). Vygotsky's Theory of Cognitive Development [Online Video]. 28 February 2020.Availablefrom:<https://www.youtube.com/watch?v=8I2hrSRbmHE>. [Accessed: 19 October 2021].

This video is a perfect example of Vygotsky's theory, like it very much. It simply shows the whole process for children and their grow stages with cognitive skills.

The source has more than half a million subscribers, it is very easy showed and highly motivated for the audience.

I haven't got a chance to use the video, because of the file format. It is one of the best version on video creation to be seen and implement in daily routines between teachers and children.
