There lies with proper form of services required in the organization from the use of digital skills. Teamwork is the important skill that is enhanced among the staff members from the use of employability. It is necessary to develop teamwork by the employee to make effective employability skills.

Employee efficiency

The entire business can be developed from the use of academic and employability that helps to increase the skills of employee. The entire business of restaurant needs to be carried out in such a manner that helps to reduce time and deduct the high chances of error. This provides high efficiency of employee from the use of academic and employability. The high form of efficiency is increased in managing the efficiency of employee properly at the time of enhancement of services among the customers. The proper techniques need to be focused in the employability to deliver better services for the customers from effective managing of employees. The high performance of staff members is gained from the managing of academic and employability (Laybats and Tredinnick, 2017).

Process for improving the academic and employability

There are various form of techniques that needs to be focused by the management from the use of academic and employability. The improvement of workplace arises by providing of suitable form of training among the staff members that helps to increase the productivity in the restaurant business. The relevant data and set skills helps to implement better form of productivity required within the organization. The suitable form of initiation helps the staff members to become more productivity for delivering of better services among the customers. The management of Indian Restaurant Company needs to be focused about providing of better services among the customers. These techniques can be carried out through academic and employability at the time of planning better productivity. The performance can be measured through determining the employees' weakness and strength in the particular digital areas. The strength of employee helps the staff members or waiter to provide better services in the organization. The suitable form of techniques leads in improving the performance of firm with the use of employability skills. The proper form of efficiency arises with the suitable form of techniques by providing of better knowledge about the importance of academic and employability required in the organization. The training activity helps to deliver suitable form of techniques to gain knowledge among the staff members from academic and employability that enhances better form in managing the entire operations. This helps Indian Restaurant business to gain maximum amount of profit from the employability skills knowledge required among the waiter to provide unique services in the

restaurant. This provides different form of services among the customers from the unique academic knowledge (Hair *et al.* 2015).

Research method

The entire information in the academic and employability arise from the data collection process. There lies with proper form of evidences in the Indian restaurant to provide better form of information from the waiter as well as customers. The proper form of market research helps to enhance suitable form of information gathered from the data collection process. This helps to carry out the effective form of analysis on the gathered data. There lies with two modes of data collection process that formulates in primary as well as secondary data collection techniques. The primary data collection process lies in gathering of information through the helps of observation, interview and survey techniques (Lazar *et al.* 2017). The primary data collection techniques formulates in gathering of information that lies in the real and relevant area. The proper forms of observations are carried out on the set of customers that helps to gather information in academic and employability. The waiter performances are increased through the using of technology in digital skills. There are collection of various feedback that arise from the customers about the use of academic as well as employability and planning process to deliver better form of services within the Indian Restaurant. The interview process are carried out among the manager of Indiana Restaurant that helps to gather suitable form of information regarding the use of academic and employability. This interview process helps to understand the importance of academic and employability among the staff members that lies with waiter and other employees. The employee learning skills are developed from suitable skills in employability required to provide better form of services in the Indian Restaurant. Secondary data collection process are carried out from the opinions of various authors, journals about the academic and employability. This helps to collect information as the secondary form of sources required within the workplace. The research process is the most important factors that help to make relevant information on the research work (Livingstone *et al.* 2017).

Knowledge gained from academic and employability

This learning skill has helped to develop completing new areas in learning skills among the employees. The academic and employability have provided suitable form of techniques in developing of knowledge among the employee especially waiter with the better form of services among the customers. In this case, the use of academic and employability has helped better form of services among the waiter to understand the order demanded by the customers. The suitable form of techniques arises in the academic and employability to deliver better services with the use of knowledge in employability set skills. The better fork of techniques in academic and employability helps the Indian restaurant to get maximum number of customers. The restaurant is well connected with the social media sites that help to attract tourists as well as locals. The management of restaurant has managed to implement necessary information on their official sites to get the required information about the services or products. Customer can able to access the websites made by the restaurant company to make the entire business successful (Patten and Newhart, 2017).

This helps to deliver better form of learning with the enhancement of new ideas among the staff members from the effective use of academic and employability. Effective academic and employability can be enhanced from the use of employability in the growth of modern business. In this high stake of competition in the market, the restaurant business needs to focus on the better delivery of services among the customers that helps to make trademark for the customers (Griffin and Care, 2014).

Conclusion

It has been concluded that the academic and employability and research method helps to enhance better form of services among the customers. This provides as the leading source of business in the market from the effective use of academic and employability. The entire data collection process is carried out in such a manner that helps to gather suitable form of information in the carried out research work. Both primary as well as secondary data collection techniques are followed to gather suitable information about the importance of academic and employability. The proper academic and employability help to retain maximum number of customers in the Indian Restaurant. In this case, waiter gets major benefits from the digital skills by gathering of

useful information of records in order provided from the products or service delivered among the customers.
