1. Surname and First Name
2. Student Number
3. Institute
4. Student Status (See appendix A) – Most Common is E for Enrolled. If you have students who are PE they have not fully completed Enrolment and will need chasing. NE student haven not yet enrolled and urgently need to do so
5. Course, Route Code and Route Title (See appendix B)
6. Year and Occurrence (See appendix C)
7. Start Date. Expected End Date and HESA Start Date. Students who have a different HESA start date are those who have started a different programme before this one. For example Student may have progressed from a HND to a BSC. So the profile will show the start date of the BSC and the HESA start date will be the date of the HND.
8. This box shows the recommendation that is populated through the system. If it is blank then this process has not been carried out. Some smaller programmes may not yet have rules in place for this to work. Also this process is only run before an exam board. So there may be a few reasons why you may not see this information. But if it's missing and you think you should have a recommendation here please let us know. PLEASE NOTE. This is only a system generated recommendation. The Exam Board makes the decision and we update any recommendations according to the minutes of the board. (See appendix H for full list of codes)
9. Academic Year the Modules are registered in
10. Module Code, Title of Module. Check for Recognition of Prior Certified Learning Modules if your student should have any. The Module Code will show as RP(C)L Followed by the Level in roman numerals then the credit amount. So if a student has come in to level 5 as a direct entrant you would expect to see RP(C)LIV120 module code on their record including their 120 Level 5 modules.
11. Semester in which the module is running (See appendix D)
12. Location of Module S = Swansea (see appendix E)
13. Attempts (See appendix F)
14. Credit value of the module
15. Level of Module
16. Total amount of credits registered on
Total amount of credits achieved
17. Modules from the previous academic year.
18. Component Marks and Grades of Modules. If the component mark is underlined this denotes that the assessment was an exam. (See appendix G)
19. Overall Module Mark and Grade. (See appendix G)
20. At the end of a student's profile you will also find the total credits a student is registered on and the amount of credits achieved. For example at the start of their third year of a BSc you would expect to see. Total Credits = 360 Credits achieved =240
21. Award detail – These few lines give you information on any Award the student may have achieved. In this example the student has not reached the end of their programme therefore will be populated with Unknown or blank.
22. This is a Batch code that we use to group students for registry purposes only.
23. Weighted Average up to the best 100 credits table. Data will appear when student has completed a level.
24. Exam board notes – You will find notes here when a student may have suspended studies or possibly some notes about a student who is repeating the year. These are NOT minutes of the board just additional notes regarding the student's profile.
25. Date of Previous Exam Board / Previous Exam Board Minute.

Appendix A – Student Status

Student Statuses code gives us some information about their current status. The majority of students will appear on the profiles as E for Enrolled. Which means that they have successfully completed enrolment. You may get some who are PE partially enrolled which means they may have some outstanding items for enrolment and NE are student who have not enrolled. See list below for other codes that you may come across. It is unlikely you will see any of the graduated statuses as they are unlikely to be at board if they have already exited or graduated.

Student Status code	Full name
E	Enrolled in the Current Academic Year
NE	Not Enrolled
PE	Part Enrolled
ECON	Enrolled Continue
PECON	Partially Enrolled Continue
W	Withdrawn
DW	Deemed Withdrawn
G	Graduated
GE	Graduated with an Exit Award (Not intended)
N	Normal Completion (students completed credits only)
NH	Withdrawn No HESA Return
ENM	Current Student No Modules in Current Ac Year
NERM	Not Enrolled Repeat Modules

Appendix B - Course, Route Code and Route Title

At point 5 on the example profile above it will show the Course Code, Route Code and Route Title of the student. You will need to check to make sure that the student is on the correct course and route.

This can cause some confusion. Within the student records system, every student has a programme, course and route

When we refer to programme we are talking about the overall intended award i.e BA, BSC, MA etc

When we refer to course we are taking about a variation of the programme. Generally it contains the mode of attendance and/or length of the programme if not standard for example you may be registered on a BA programme but your course code would be BA-PT if you were studying part time. You might have a course code of BA2 if you were registered on the 2 year fast track version of the BA. If you were a standard full time three year BA your Programme code would be BA and your course code would be BA.

Route for example EEEHND (HND for Higher National Diploma) is Electrical & Electronic Engineering. The code includes the programme as you can see this is the HND version. You may also get EEEFD (FD for foundation) which is the foundation version and a BSC would be EEESH (SH is for single honours) but the title would be the same for all three Electrical & Electronic Engineering. So when you put the data together you would get something like this

Please note that all partner institutions have their identifier at the end of their route code for example EEEHND-SG (SG for Coleg Sir Gar).

e.g

Programme	Course	Route Code	Route Title
HND	HND-PT	EEEHND	Electrical & Electronic Engineering
HNC	HNC	EEEHNC	Electrical & Electronic Engineering
BA	BA2	EYPSSH	Early Years Education and Care: Early Years Practitioner Status
BSC	BSC	APCSH	Applied Computing

Appendix C - Year and Occurrence of the Student

Check that the Student is on the correct Year 1, 2 or 3. Year is not equivalent to the amount of years they have been with us they equate to Level. Therefore if you are part time and are still in Level 5 of the programme you will be in the 2 year. This is only true for undergraduate programmes. Postgraduate students will be recorded by how many academic years they have been studying.

Occurrence

Occurrence is used to describe a few things

XXYYZZ and example would be = BS09XX

XX - the first two characters are the Location codes BS = Business School (see table)

YY – the second two characters are the month of Entry 09 = September

ZZ – These are used for Distance Part time and Postgrad students (see table) if they are XX Its just means they are blank spaces on the end

ZZ	Description

Appendix D - Semester in which the module is running

This tells you in which Semester the module is running. These are the semester codes that are used predominantly for most programmes, you may get a few bespoke codes for out of the ordinary programmes but in general these are what you will come across.

Code	Description
Sem1	Semester 1 - Short and Fat Semester starting in September/October
Sem2	Semester 2 - Short and Fat Semester starting in January/February
Sem1&2	Semester 1&2 - Long and thin Semester starting in September/ October and Finishing May/June
Sem 2&3	Semester 2&3 - Long and thin Semester starting in January/February and Finishing September
Sem3	Semester 3 - Short and Fat Semester starting in May/June and finishing in September

Appendix E – Location of Module

This is location of the module not the campus in which the student is attached to. For the majority of students their modules locations will relate to the students location but you may get a few students studying modules in different locations but unusual.

Appendix F – Attempts

There are two columns on the profiles to identify how many attempts a student has for a module. The first column tells you what attempt they are on and the second tells you if they have completed an attempt.

For example in this student hasn't submitted any marks for a module and are attempting the module for the first time it would show as 1 0

If the student had submitted and passed their first attempt it would show as 1 1. Given one attempt and completed one attempts

If the student had failed their first attempt it would show as 2 1 . The second column now shows that they have submitted once, but because they have failed the system has incremented the first column to 2 to show that they now have the opportunity for a second attempt

If they fail their second attempt the number in the column would be 3 2. (and if they were an undergraduate they would be on their third and final attempt.)

6	C	P	C
12	1	0	
	1	0	
	1	0	
	1	0	
	1	0	
	1	0	

Column C	Column P	Description
1	0	On first attempt has not yet submitted first attempt
1	1	On first attempt, submitted and passed on first attempt
2	1	On second attempt has not yet submitted second attempt
2	2	On second attempt, submitted and passed on second attempt
3	2	On third attempt has not yet submitted third attempt
3	3	On third attempt, submitted and passed on third attempt
4	3	Failed third attempt regulation would not allow fourth attempt

Please note that just because the system has generated a new attempt for the student it does not mean that they are allowed one. The examining board determines whether or not the student is allowed a resit.

Appendix G – Component Marks and Grades of Modules and Overall Marks and Grades

Component marks are displayed on the left hand side of the profile underneath the module codes. Component marks are displayed in order of the way they were published in the validation document for that module. You will have a mark and the a grade for example 53 P (Pass) 32 F (Fail)

Other Codes are used in the Grade column such as

Code	Description	Notes
P	Pass	
F	Fail	
NP	No Penalty	Only inputted by registry after a decision has been given from the Academic Office
CM	Compensatory measures	Only inputted by registry after a decision has been given from the Academic Office
NA	Non Attempt	Can only have mark of 0 when NA is used.
PL	Plagiarism	Inputted by the Academic when plagiarism is suspected and a case has been given to the academic office.
PW	Plagiarism Withdrawn	When the plagiarism has been agreed by the Academic Office and a penalty has been given. Only inputted by registry

If there are missing component marks for a module you will have blank spaces. For example if a module had three component marks and the 1st was missing it would look like this

Blank 45 P* 32 F*

You will also find a star next to the inputted marks to show that the module is incomplete. You would also not have an overall grade and mark on the right hand side of the row.

Overall marks are displayed at the right hand side of the row containing the component marks. These are calculated using the percentage weighting of the component marks. Grade codes could be any of the following

Code	Description	Notes
P	Pass	
F	Fail	
MT	Merit	Used for HN awards
DI	Distinction	Used for HN awards
CN	Condoned Module	Module that has only just failed and has been condoned
