Keep your self protected from online risks

ONLINE DIGITAL SAFETY

Here are some important tips that can help with digital online safety and protection

 **secure your details with strong passwords**

from time to time change your passwords to make it harder for hackers to get into your accounts. Your passwords should be long with numbers, letters and punctions

 **Be aware of your downloads on all devices**

Make sure you only download data from TRUST worthy websites

 **Enter settings and turn on privacy**

By enabling privacy features you have more control of your own data. You can also get a VPN

 **Always review your posts before posting them**

Do not share personal information online if you don't wish for them to go public. the internet is a public place where anyone can get hold of your details.

 **download anti-virus programs**

Regularly updated your antivirus softwares in order to prevent possible threats from gaining access to your personal information.
