Hey man! I just heard some of your work and I was very impressed with the sound of your production. I am currently working on a Hip-Hop/Grime album and I was wondering if you have any beats or if you would be willing to collab and make a beat together. I am looking for some hardcore, aggressive instrumentals, so let me know if you'd be interested in that. Thanks!

Hiya! Thanks for reaching out! I'm glad you've liked my stuff and yes, I would love to collaborate on a Grime project. Let's arrange a call, so we can talk a bit more about what specifically you're looking for. Let me know if you're free to talk this week.
