

LEVEL 6 ASSESSMENT SPECIFICATION

Student name:		Student ID number:	
Programme:	PGCE Primary and Secondary		
Module:	The learner: who am I teaching?		
Module code:	ECAD6007	<u>Contribution to Overall Module Assessment (%)</u> :	100%
Lecturer:	Karl Jones/Ian Jones	Internal Verifier:	Dr S.V.Hughes
Assignment Title:	A critical evaluation and the Word count (or Equivalent to 5000 identification of next teaching equivalent): words. and learning steps focusing on a case study of an individual learner or a group of learners, based on an observed critical incident.	Word count (or equivalent):	5000
Submission deadline:	07/11/22 (23:59)	Return date of provisional marks & written feedback:	05/12/22
Submission method:	All written assessments, where practical and possible, must be submitted via Turnitin unless otherwise instructed by the Lecturer. (Please DO NOT put this assessment specification into Turnitin or it will match many similarities with other students' submissions.) Alternative submission method (if applicable): Late submission of the assessment will result in a late penalty mark. Penalties for late submission: Up to one week late, maximum mark of 40%. Over one week late, 0%. Only the Extenuating Circumstances Panel may approve a change to submission dates.		
Academic honesty / referencing:	Academic honesty is required. In the main body of your submission you must give credit to authors on whose research and ideas your work is based. Append to your submission a reference list that indicates the books, articles, etc. that you have used, cited or quoted in order to complete this assessment.		

Module Learning Outcomes (from module syllabus)

Upon the successful completion of this module, the student-teacher should be able to demonstrate the ability to:

- evidence a critical understanding of theories and research that impact on wellbeing, child development and learning from 0-19 years and apply this to personal practice;
- present a personal, critical stance on the role of the professional teacher in relation to meeting the needs of a diverse range of children and young people, including challenging assumptions, beliefs that lead to prejudice and stereotyping;

critically reflect and evaluate a range of different approaches for meeting the diverse needs of all learners in a range of settings, and justify choices made in personal practice.

TASK DESCRIPTION

Title:

A critical evaluation and the identification of next teaching and learning steps focusing on a case study of an individual learner or a group of learners, based on an observed critical incident.

Word count: 4,000 words for written assignment with 1,000 word equivalence for lesson observations and incident reflections. This means that the written assignment should be 4,000 words (or 10% above or below).

The words within the appendices are not 'counted' but the preparation of appendices is considered equivalent to 1,000 words worth of work.

This assignment requires you to critically evaluate research and key theories that underpin the holistic development of children and young people, in relation to ensuring pupil progress. You will also be required to critically evaluate strategies and approaches to best support equality and diversity, including challenging beliefs and assumptions.

In particular, you should:

- undertake reading about learning theories, child development and barriers to learning.
- demonstrate awareness of the developing curriculum in Wales, in particular the Four Purposes, and consider the implications of this on the critical incident you observe.
- Identify a specific 'critical' incident to discuss
- Reflect on and evaluate your classroom observation.

Essential Reading

This assignment requires that you show knowledge and understanding of the current curriculum requirements and curriculum developments in Wales although you will be guided by the curriculum the school currently uses. You will need to demonstrate that you understand the holistic development of the learner. Readings have been provided on Moodle and you could also use other readings that you identify independently.

Assignment Structure

This section provides a suggested structure for your assignment although please note that it is guidance only; you should therefore not allow the guidance to limit your writing. Throughout the assignment, avoid making claims without supporting them with your reading.

1. INTRODUCTION (approximately 250 words)

In the introduction you should show that you understand the title of the assignment and set out what you intend to discuss. Outline the use of critical incidents in the context of reflective practice in teaching.

1. The role of critical reflection (approximately 500 words)

In this section, you will need to demonstrate that you understand the role of critical reflection in your developing teaching practice. You can discuss areas such as the developing role of teaching as a profession, as well as link to reforms in education and the roles of teachers.

2. OBSERVATION School & Class context (approximately 250 words)

Give important contextual information such as the type of school and age group/s involved. Please note that you should ensure the name of your PTE school is not included within the written assignment. Refer to BERA (2018) guidelines for anonymity explicitly here.

Critical incident linked to Donaldson's Four Purposes (approximately 500 words)

In this section, you will need to describe the critical incident but make sure that you link it to at least one of the Four Purposes. This will allow there to be criticality as opposed to pure description.

LITERATURE REVIEW (approximately 1,500 words)

By focusing on a critical incident, you will have identified a number of areas for potential research. Choose 2-3 of these areas. The purpose of reviewing literature is to provide context for the assignment. A good literature review identifies and synthesises key points. You should read widely and consider different perspectives in your writing. Within a literature review you should aim to highlight key points (avoid simply reporting what has been read) and identify differing perspectives. An effective literature review will lead the reader through key points, highlighting similar or differing perspectives that may exist. In an

effective literature review you will show that you are thinking about what you are reading in a critical way; i.e. you are not describing or reporting what has been written, but you are considering the implications of what has been written. Although there are essential texts, there is no recommended number of texts. It is far better to synthesise a smaller number of texts well than to use a long list of texts badly. The word counts are designed to encourage you to be selective in your reading. Remember that Harvard referencing stipulates that all references in your list (NB 'References' or 'Reference List' and not 'Bibliography') have been referred to in the body of the assignment.

REFLECTION / EVALUATION & NEXT STEPS (approximately 700 words)

Reflect and evaluate on your focus of the critical incident and identify next steps. When you present suggestions, be tentative in your language. This means that you can suggest but not criticise as this conflicts with ethical practice. Discuss the role of critical reflection and the use of reflection models to structure reflections. You will also need to demonstrate how this approach will inform your own professional and personal development.

CONCLUSION (approximately 300 words)

In this section, provide an assessment and summary of the approach you have taken. It is important that you link your approach to the role of the reflective practitioner in Wales and the new Professional Standards for Teaching and Leadership.

APPENDICES (equivalence to 1,000 words)

Include your annotated lesson observation sheets and your four Critical Incident reflection sheets. It is considered good practice to cross-reference so that you refer to your numbered appendices in the body of the assignment.

GUIDANCE FOR STUDENTS IN THE COMPLETION OF TASKS

NOTE: The guidance offered below is linked to the five generic assessment criteria overleaf.

1. Engagement with Literature Skills

Your work must be informed and supported by scholarly material that is *relevant* to and *focused* on the task(s) set; you should make use of scholarly reviews and primary sources, where appropriate (for example, refereed research articles and/or original materials appropriate to the discipline). You should provide evidence that you have accessed a wide *range* of sources, which may be academic, governmental and industrial; these sources may include academic journal articles, textbooks, current news articles, organisational documents, and websites. You should consider the *credibility* of your sources; academic journals are normally highly credible sources while websites require careful consideration/selection and should be used sparingly. Any sources you use should be current and up-to-date, mostly published within the last five years or so, though seminal/important works in the field may be older. You must provide *evidence* of your research/own reading throughout your work, using a suitable referencing system, including in-text citations in the main body of your work and a reference list at the end of your work.

Guidance specific to this assessment:

Your observation of a critical incident will allow you to identify 2-3 areas to research. These will guide your literature review. It is important, however, to demonstrate your reading throughout the assignment. This reading should include texts on learning theory, reflective practice, classroom observation and critical incident methodology.

2. Knowledge and Understanding Skills

At level 6, you should be able to demonstrate coherent and detailed knowledge and a systematic understanding of the subject area, at least some of which is informed by the latest research and/or advanced scholarship within the discipline. You should be aware of the uncertainty, ambiguity and limits of knowledge. Your work must demonstrate the growing extent of your knowledge and systematic understanding of concepts and underlying principles associated with the subject area. *Knowledge* relates to the facts, information and skills you have acquired through your learning. You demonstrate your *understanding* by interpreting the meaning of the facts and information (knowledge). This means that you need to select and include in your work the concepts, techniques, models, theories, etc. appropriate to the task(s) set. You should be able to explain the theories, concepts, etc. meaningfully to show your understanding. Your mark/grade will also depend upon the *extent* to which you demonstrate your knowledge and understanding; ideally each should be complete and detailed, with comprehensive coverage.

Guidance specific to this assessment:

You will be expected to demonstrate knowledge of how children and young people learn, with a particular focus on theory relating to at least one of Donaldson's (2015) four purposes. Your understanding of this will be demonstrated through your analysis and through your suggestions of next steps. You will also need to show understanding of the Professional Standards for Teaching and Leadership and the role of reflective practice.

3. Cognitive and Intellectual Skills

You should be able to: critically evaluate evidence, arguments, assumptions, abstract concepts and data some of which are at the forefront of a discipline (and that may be incomplete) to devise and sustain arguments, to make judgements and/or solve problems; describe and comment upon particular aspects of current research, or equivalent advanced scholarship, in the discipline. Your work must contain evidence of logical, analytical thinking, evaluation and synthesis. For example, to examine and break information down into parts, make inferences, compile, compare and contrast information. This means not just describing what! But also justifying: Why? How? When? Who? Where? At what cost? At all times, you must provide

justification for your arguments and judgements. Evidence that you have reflected upon the ideas of others within the subject area is crucial to you providing a reasoned and informed debate within your work. Furthermore, you should provide evidence that you are able to make sound judgements and convincing arguments using data and concepts. Sound, valid conclusions are necessary and must be derived from the content of your work. Where relevant, alternative solutions and recommendations may be proposed.

Guidance specific to this assessment:

You will need to use criticality when you synthesise your reading. Consider counter arguments and challenges to what is stated. There will be key points in the assignment when you will reflect on and critically evaluate your observations. You will need to evaluate the incident you have chosen and consider what this might show you about the learner, ensuring you consider different possible perspectives and trying to ensure you challenge possible assumptions or beliefs. Make sure you justify claims that you make

4. Practical Skills

At level 6, you should be able to apply the methods and techniques that you have learned to review, consolidate, extend and apply your knowledge and understanding, and to initiate and carry out projects. You will deploy accurately established techniques of analysis and enquiry relevant to the discipline, and apply them in complex and unpredictable contexts, to devise and sustain arguments and/or to solve problems. You should be able to frame appropriate questions to achieve a solution - or identify a range of solutions. You should be able to demonstrate how the subject-related concepts and ideas relate to real world situations and/or a particular context. How do they work in practice? You will deploy models, methods, techniques, and/or theories, in that context or circumstances, to assess current situations, perhaps to formulate plans or solutions to solve problems, or to create artefacts, some of which may be innovative and creative. This is likely to involve, for instance, the use of real world artefacts, examples and cases, the application of a model within an organisation and/or benchmarking one theory or organisation against others based on stated criteria. You should show awareness of the limitations of concepts and theories when applied in particular contexts.

Guidance specific to this assessment: You will need to provide suggestions for how to support the learner and need to be able to justify these suggestions and consider how these might work in practice. Practical aspects will be demonstrated through your clear understanding and application of the critical incident methodology in your work.

5. Transferable Skills for Life and Professional Practice

Your work must provide evidence of the qualities and transferable skills necessary for graduate-level employment requiring the exercise of initiative and personal responsibility and decision-making in complex and unpredictable circumstances. This includes demonstrating: the learning ability for professional development to advance existing skills and acquire new competences of a professional nature that will enable you to assume significant responsibility within organisations; that you can initiate and complete tasks and procedures, whether individually and/or collaboratively; that you can use appropriate media to effectively communicate information, arguments and analysis in a variety of forms to specialist and non-specialist audiences; fluency of expression; clarity and effectiveness in presentation and organisation. Work should be coherent and well-structured in presentation and organisation.

Guidance specific to this assessment: You should ensure the use of professional language throughout your work. Your work and the sections within should form a clear narrative and arguments.

STUDENT FEEDBACK FORM

This section details the *extent* to which the assessment criteria are demonstrated by you, which in turn determines your mark. The marks available for each category of skill are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

Generic Assessment Criteria	Marks available	Marks awarded

GENERIC ASSESSMENT CRITERIA

Level 6

In accordance with the Framework for Higher Education Qualifications, at the end of Level 6 students should have coherent and detailed knowledge and a systematic understanding of their subject area, at least some of which is informed by the latest research and/or advanced scholarship within the discipline. They will be able to accurately deploy established techniques of analysis and enquiry within a discipline, using their conceptual understanding to devise and sustain arguments and/or to solve problems. They should be aware of the uncertainty, ambiguity and limits of knowledge. They should be able to critically evaluate evidence, arguments, assumptions, abstract concepts and data (that may be incomplete), to make judgements, and to frame appropriate questions to achieve a solution - or identify a range of solutions. They will apply the methods and techniques that they have learned to review, consolidate, extend and apply their knowledge and understanding, and to initiate and carry out projects. They will have the ability to manage their own learning, and to make use of scholarly reviews and primary sources (for example, refereed research articles and/or original materials appropriate to the discipline). They will demonstrate the qualities and transferable skills necessary for employment requiring: the exercise of initiative and personal responsibility; decision-making in complex and unpredictable contexts; the learning ability needed to undertake appropriate further training of a professional or equivalent nature.

Level 6	FAIL	MARGINAL FAIL	SATISFACTORY	GOOD	VERY GOOD	EXCELLENT
Category	F	E	D	C	B	A
Engagement with literature (including reading, referencing, academic conventions and academic honesty)	Little or no evidence of reading and/or reliance on inappropriate sources. Views and findings mostly unsupported and non-authoritative. Referencing conventions used incoherently or largely absent.	Poor engagement with essential reading. No evidence of wider reading. Reliance on inappropriate sources, and/or indiscriminate use of sources. Heavily reliant on information gained through class contact. Inconsistent and weak use of referencing.	Engagement with a limited range of mostly relevant and credible sources. Some omissions and minor errors. Referencing conventions evident though not always applied accurately or consistently.	Engagement with an appropriate range of research-informed literature, including sources retrieved independently. Some over-reliance on texts. Referencing may show minor inaccuracies or inconsistencies.	Engagement with a wide range of research-informed literature, including sources retrieved independently. Selection of relevant and credible sources. Very good use of referencing, with no/very few inaccuracies or inconsistencies.	Engagement with an extensive range of relevant and credible literature, informed by the latest research. Consistently accurate application of referencing.

Knowledge and understanding (Coherent and detailed knowledge and systematic understanding of the subject area, at least some of which is informed by the latest research and/or advanced scholarship within the discipline.)	Major gaps in knowledge and systematic understanding of the subject matter. Substantial inaccuracies. No awareness of knowledge of the latest research and/or	Gaps in knowledge, with only superficial systematic understanding. Some significant inaccuracies and/or irrelevant material. No awareness of knowledge of the latest research and/or	Limited knowledge and systematic understanding of the relevant concepts and principles within the subject area which to some limited extent, is informed by current research and scholarship.	Knowledge is reasonably detailed, accurate with a good systematic understanding of the field of study and to some extent, current research and scholarship.	Knowledge is reasonably extensive coherent and detailed. Exhibits very good understanding of the breadth and depth of established views, and the work is, at least in part, well-informed by current	Excellent coherent and detailed knowledge and systematic understanding of the principles and theories of current research and scholarship. 	advanced scholarship within the discipline.	advanced scholarship within the discipline.			research and scholarship.	established views and the limitations of the knowledge base.
Cognitive and intellectual skills (Conceptual and critical thinking, analysis, synthesis and evaluation of research, assumptions, abstract concepts and data (that may be incomplete); logic, argument and judgement.)	Wholly or almost wholly descriptive work. Little or no analysis, synthesis or evaluation. Failure to develop arguments, leading to illogical or invalid judgements. Unsubstantiated generalisations, made without use of any credible evidence.	Largely descriptive work, with superficial use of critical evaluation. Weak development of arguments and judgements. Information accepted uncritically, uses generalised statements made with scant evidence and unsubstantiated opinions. Ideas sometimes illogical and contradictory.	Limited attempt at critical thinking, analysis, synthesis and evaluation, tending towards description. Some evidence to support emerging arguments and judgements but these may be underdeveloped or with a little inconsistency / mis-interpretation. Asserts rather than argues a case.	Some critical thinking, analysis, synthesis and evaluation. Can analyse new and/or abstract concepts and data without guidance. An emerging awareness of different stances and ability to use evidence (that may be incomplete) to support the argument. Mostly valid arguments and logical judgements. Some tendency to assert/state opinion rather than argue on the basis of reason and evidence.	Sound critical thinking, analysis, synthesis and evaluation demonstrating critical thinking. Ability to devise and sustain persuasive arguments, and to review the reliability, validity and significance of evidence (that may be incomplete) to make mostly appropriate and valid judgements.	Excellent critical thinking, analysis, synthesis and evaluation. Ability to investigate contradictory or incomplete information and make strong, persuasive, arguments and sophisticated judgements. Some evidence of independent thought and ability to 'see beyond the question', suggesting a grasp of the broader field and wider concepts.
Practical skills (Apply/deploy accurately established tools and techniques; initiate and carry out projects; formulate solutions to solve problems in complex and unpredictable contexts.)	Limited or no use of methods, materials, tools and/or techniques. Little or no appreciation of the context of the application. Limited understanding of the application of theory to practice or making appropriate links between the two. Very weak problem-solving skills in	Rudimentary application of methods, materials, tools and/or techniques but without consideration and competence. Flawed appreciation of the context of the application. Weak understanding of the application of theory to practice, with only occasional evidence of making	An adequate awareness and mostly appropriate application of well-established methods, materials, tools and/or techniques. Basic appreciation of the context of the application. Theoretical knowledge and understanding applied in practice, but not	A good and appropriate application of standard methods, materials, tools and/or techniques. Clear appreciation of the context of the application. Mainly consistent, accurate and logical application of theory to practice, making appropriate links between the two	A very good application of a range of methods, materials, tools and/or techniques. Very good consideration of the context of the application, with perceptive insights. Can identify problems and propose appropriate solutions in complex and	An advanced application of a range of methods, materials, tools and/or techniques. The context of the application is well considered, and insightful. Application and deployment extend beyond established conventions. Can identify complex problems and propose

	complex and unpredictable contexts.	appropriate links between the two. Weak problem-solving skills in complex and unpredictable contexts.	always making logical links between the two. Can identify problems and propose basic solutions in complex and unpredictable contexts without fully appreciating the complexity.	Can identify problems and propose mostly appropriate solutions in complex and unpredictable contexts.	unpredictable contexts. Evidence of some innovation and creativity.	excellent solutions. Innovation and creativity evident.
Transferable skills for life and professional practice (Exercise of initiative and personal responsibility; professional development; initiate and complete tasks and procedures: individually and/or collaboratively; use appropriate media to communicate effectively; fluency of expression; clarity and effectiveness in presentation and organisation.)	Communication medium is inappropriate or misapplied. Work is poorly structured, disorganised and/or confusingly expressed. Very weak use of language and/or very inappropriate style. Little or no evidence of autonomy (or collaboration, where relevant) in the completion of tasks. Little or no evidence of the skills required in graduate employment.	Communication medium is poorly designed and/or not suitable for the audience. Work is poorly presented in a disjointed manner. It is loosely, and at times incoherently, structured, with information and ideas often poorly expressed. Weak use of language and/or inappropriate style. Weak independent initiative (or collaboration, if relevant). Limited evidence of the skills required in graduate employment.	Can communicate in a suitable medium but with some room for improvement. Mostly ordered presentation and structure in which relevant ideas / concepts are reasonably expressed. Work may lack coherence in places. Can work as part of a team, but with limited involvement in group activities. Demonstrates the basic skills required in graduate employment, with some areas of minor weakness.	Can communicate effectively in a suitable format, but may have minor errors. Mostly coherent, organised work, in a suitable structure and is for the most part clearly expressed. Can work effectively independently and/or as part of a team, with clear contribution to group activities. Demonstrates the skills required in graduate employment, with some areas of strength and some of minor weakness.	Can communicate well, confidently and consistently in a suitable format. Work is coherent, fluent, well-structured and organised. Can work very well autonomously and/or as part of a team, with very good contribution to group activities. Demonstrates very good graduate employment skills, with just occasional minor weakness.	Can communicate professionally confidently and consistently in a suitable format. Work is coherent, very fluent and is presented professionally. Can work autonomously with initiative. Where relevant can work professionally within a team, showing leadership skills as appropriate, managing conflict and meeting obligations. Demonstrates excellent graduate employment skills and an appetite for further development.
