Self-Evaluation

Conclusion and Self Evaluation

Over the Visual Studies module, I've been pleasantly surprised by the amount of improvement I've gone through as someone who'd struggle to draw before.

While I know I'm not, and will never perfect, this reflection has helped me to know the steps I need to take to keep learning and honing my skills so that in the future I can look back half a year, and even a whole year, and be prouder of the achievements and progress I've made.

Development Plan				
NAME:	Arif Khamis	STUDENT NUMBER:	2305406	
COVERING THE PERIOD FROM:	November 2024	TO:	November 2025	
This record sheet is for your guidance only – you may present your development plan in any other format.				
Planned outcome				
Where do I want to be by the end of this period? What do I want to be doing? (This may be evolutionary or "more of the same".)				
What do I want/need to learn or develop?	What will I do to achieve this?	What resources or support will I need?	What will my success criteria be?	Target dates for review and completion
(Specific & Relevant)	(Specific)	(Achievable)	(Measurable)	(Timebound)
To get over perfectionism so I don't lose motivation and faith in my work too quickly.	Practice putting inhibitions aside and creating enough work so that I feel comfortable and used to my skill level.	I'll be needing support and being able to consult peers and teachers around me.	I need to hear and absorb constructive criticism from teachers and peers that can keep me grounded and feel part of something bigger – which keeps me motivated	May 2025, and November 2025
To improve physical and spatial skills especially for drawing in perspective and anatomy without having to think too hard about it.	I will be more observant and present in the world, as well as practicing a lot and staying hard at work.	I'll be needing to keep an eye out, and making sure I have adequate equipment, and a new external hard drive to put phone pictures in	I'll be sure to pay attention to the world by stepping outside more often and observing concrete details and the ways the environment around me changes.	May 2025, and November 2025
To improve creativity and try out new directions in art I've not thought about before, to hopefully find a style of my own.	I will try to challenge myself as well as absorbing many different art mediums to find a direction I'd like to follow.	Social media, peer recommendations, library books, educational websites, or even general online content.	I'll be creating more art inspired by such sources until I find overlap and certain parts I feel I identify with.	May 2025, and November 2025

Work Summary

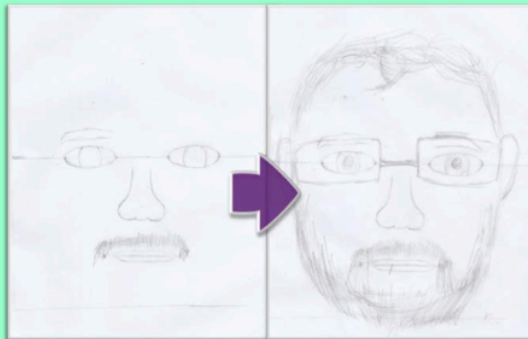

Perspective Drawing

- Perspective image drawn
- Proud of venturing into the endeavour
- The logic was intact, though a mistake is present.
- As it was my first time, I knew I'd just needed more practice.

Anatomy - Facial

- Drawing the face took a while
- Worried about inaccuracy despite lack of experience
- Spent too long focusing on numerical guidelines to produce perfect result first time
- Practice getting a feel for it – intuition and holistic understanding

Perspective Drawing

Overall

- Looking to improve creativity and try out new directions in art I've not thought about before, to hopefully find a style of my own.
- Challenge myself as well as absorbing many different art mediums to find a direction I'd like to follow.
- Social media, peer recommendations, library books, educational websites, or even general online content
- I'll be creating more art inspired by such sources until I find overlap and certain parts I feel I identify with.
- Now to May 2025, and from then to November 2025.

Anatomy Drawing

Overall

- To improve physical and spatial skills without having to think too hard about guidelines
 - Observant and present in the world, as well as practicing a lot and staying hard at work.
- Make sure I have adequate equipment, such as a new external hard drive to put phone pictures in
- Stepping outside more often and observing concrete details and the ways the environment around me changes.
- Now to May 2025, and from then to November 2025.

FINAL GRADE

70/100

GENERAL COMMENTS

Thanks for this Arif. There is a very good breakdown not only of your work on a base level but of your overall practice. Well done.

It would have been good to see perhaps more examples of IEEE and referencing used in relation to any tutorials/articles that may be used to help improve your practice.
