excel file course work

GRADEMARK REPORT

FINAL GRADE

8/20

GENERAL COMMENTS

Instructor

As you have saved this a Apple Numbers file, I will need to wait until I can find a colleague with a MAC for me to view your submission on before I can mark it.

This coursework was submitted late and so will be capped at a maximum of 40%.

Task 1 - 1 mark out of 2

You have rearranged the countries but not rearranged their associated values.

Task 2 - 3 marks out of 4.

You have produced the correct type of graph but have carried over the error from task 1.

Task 3 - 2 marks out of 3

You are missing the x axis label

Task 4 - 1 mark out of 2

Still missing x axis label and also missing the legend saying which data set is for which year.

Task 5 - 3 out of 9

The first equation is correct but the following ones are wrong.

You would have gotten 10/20 but due to this coursework being late it will be capped at 40% (8/20)
