Introduction

Academic and Employment skills play a perifocal role, I have discovered with my findings that people who have academic education path were more lightly to have good verbal, written, creative communication skills, work well with teamwork activities, and have respectful positive online behaviour.

Task 1: Essential Academic and Employment Skills for the future career Path

Academic and Employment skills play a perifocal role, I have discovered with my findings that people who have academic education path were more lightly to have good verbal, written, creative communication skills, work well with teamwork activities, and have respectful positive online behaviour.

Academic and Employment Skills

Essential Skills for study to employment are identical to each other, the essential skills we learn in our academic career we will apply to our professional work life, they both require critical thinking and can be downloaded with this link www.skillsforlifework.com [4] . Upon my research on essential skills for studying I have discovered if we implement academic skill from our primary years at school it will improved our social behaviour online towards one another, helps us to think and write in a positive way, improve our mental health, build our confidence and we learn to work well as a team.[2],[3]. Cyber Security has been the choice of my new career

path.

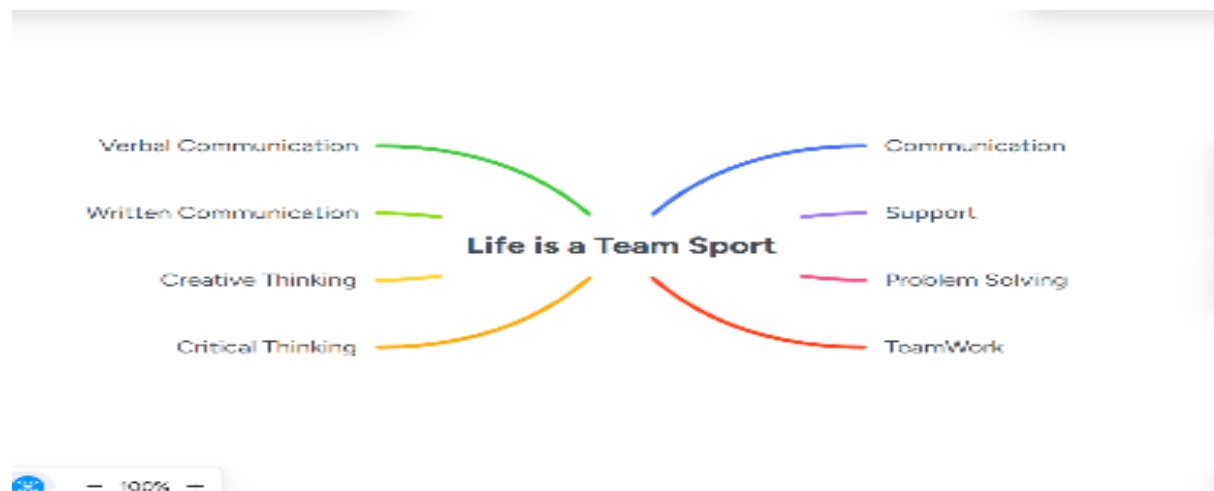

In summary, academic skills are multiple skills that supports students in our educational sector to workplace, knowing how to use these skills not only improves academic performance.

Task 1 (b): Evaluation of Task 1 (a) based on Similarity report

Based on the Similarity report, I deserve this score because my work demonstrates originality and a strong understanding of academic integrity. I have ensured that all sources are properly referenced, and any similarities identified are due to the correct use of quotations and citations. The report confirms that my submission is largely unique, reflecting my own analysis and critical thinking. I have taken care to paraphrase information where appropriate and avoided excessive reliance on external sources. This approach highlights my commitment to producing authentic work and adhering to the university's standards for academic honesty.

Task 2: Collaborative Mind Map and Individual Poster

ENHANCING TEAMWORK

Empowering others to Work Together

Emotions and empathy are the key to teamwork. Emotions show us how we communicate and respond, while empathy allows team members to understand each other.

Communication

Good written and verbal communication is vital to problem-solving and understanding of one another

Collaboration

Collaboration is the process of people working together toward a team shared goal, combining our skills and ideas.

Respect

Respect for others, understanding people's creative ideas, and contributions. We need to listen, share and collaborate together.

Committment

Sharing our ideas and willing to pursue them, taking accountability for your role and helping to keep your team members aligned.

Trust

Helps build team morale and reduces time it takes to solve problems and meet deadlines.

Shared Success

It builds morale, strengthens trust, and motivates the team by showing that victories are collective, not individual. When success is shared, it reinforces collaboration and inspires continued effort towards our goals.

Task 3: Virtual Collaboration and RefWorks

Report on Virtual Collaboration

Put your Chosen topic here

Step-by-step process of using RefWorks with visuals

Task 4: E-Portfolio Creation and Evaluation

Task 4 (a): E-Portfolio Creation

Task 4 (b): Illustrative Review of E-Portfolio tool Selection
