My Career Aspirations – what I want to do?

- I aspire to be a fully qualified electrician – throughout the majority of my career I have always been interested in this as there is a lot of thought that goes behind it.
- I already have the basic know how of various domestic installations such as the set up various lights in rooms, putting up chandeliers, rewiring wires in old houses, setting up lighting outside, changing fuses in fuse board and making sure these are wired and set up correctly.
- After doing some research I have identified that I will need to get a Level 3 Electrotechnical Qualification or attain a Diploma & NVQ

SWOT Analysis

Strengths:

- Resilient
- Emotionally intelligent
- General know how of basic electric installations

Opportunities:

- Attain electrical qualifications
- Further develop my experience through work
- Build professional profile

Weaknesses:

- Language barrier
- Still need to develop computer skills further

Threats:

- More qualified younger electricians
- Funding for course
- Managing my time

Summary

To summarise the course so far has been useful for me in supporting with understanding more about working on the computer and the literacy skills I have learnt will support me in applying for jobs in the future.

Also I feel I am more equipped to understand more about myself as well as managing my time more through the frameworks given to us such as time management and the SWOT analysis.
