

Online Examination Guide

Each exam will take the form of a timed essay that has been extended by three times the original length. For example, exams that were initially one hour are now three hours, two-hour exams are now six hours etc., giving you plenty of time to develop your essay plan based upon your prior revision, write your essay/s and prepare for submission.

Your module tutor would have given you an idea of what topics you should be revising and preparing for the exam. Therefore, you need to treat this as you would any examination by collecting journal articles, resources and writing keynotes for those topic areas now so that you are prepared when you are presented with the titles on the exam day.

The exam titles will be released at the times presented below in the exam schedule. You will then have the allocated time to complete your exam questions (on one word document) and upload to Turnitin.

Each module will have a Turnitin portal entitled *Exam Submission*, and your document needs to be uploaded in the same way as a traditional essay. That means you must include citations throughout your text. Despite not requiring a reference list, your exam will be subject to the same plagiarism check via Turnitin. So please follow the stringent paraphrasing and re-wording necessary for an academic submission. Failure to do this will result in an accusation of academic misconduct.

Unlike the usual essay submission, there will be NO draft portal, but you will have the opportunity to upload your exam three times before the final submission.

As with traditional submission, exams that are uploaded after the submission time will be capped at 40%. Those with extra time allocation for exams will upload their documents into a separate Turnitin portal entitled *Exam Submission: Extra time*.

The exam schedule for the **Psychology (BSc)** programme is below:
