GENERAL COMMENTS

Instructor

A good selection of polished pieces here Sharmaine, well done. I like the concept of the photobash piece featuring the forest - I feel perhaps more time/thought could have been given to adding depth to the figures in the piece, perhaps some colour correction, fog and shading could help with this.

Some very nice character pieces with the Full body feminine character and Pop Vinyl style designs. Well done.

Work done in ZBrush is in itself impressive at the level of study currently in University (your first semester).

Perspective piece is polished, coloured and digitised with thought given to lighting. Well done. I'd liked to have perhaps seen more examples of Perspective shown. Don't be afraid to put pieces into a portfolio that you may consider "sketchy" or "rough" as they can still illustrate your skill in a great way.

Addition of Pixel Art is very good. Its relevant to your area of study and media. Pixel sprites are done to a high standard and show a lot of character. Great work. Can't wait to see them animated!
