Persons who are involved in the selection and management of persons who may be required to assist in the recovery, identification and interpretation of digital evidence.

Since the previous version of the guide was published, the Forensic Science Regulator has published new draft Codes of Conduct and Practice covering forensic science throughout the UK. All practitioners working in the field of digital forensics must abide by these codes.

SECTION 2 – THE PRINCIPLES OF DIGITAL EVIDENCE

PRINCIPLES

- 1.1 **Principle 1:** No action taken by law enforcement agencies, persons employed within those agencies or their agents should change data which may subsequently be relied upon in court.
- 1.2 **Principle 2:** In circumstances where a person finds it necessary to access original data, that person must be competent to do so and be able to give evidence explaining the relevance and the implications of their actions.
- 1.3 **Principle 3:** An audit trail or other record of all processes applied to digital evidence should be created and preserved. An independent third party should be able to examine those processes and achieve the same result.
- 1.4 **Principle 4:** The person in charge of the investigation has overall responsibility for ensuring that the law and these principles are adhered to.

2. EXPLANATION OF THE PRINCIPLES

- 2.1 All digital evidence is subject to the same rules and laws that apply to documentary evidence.
- 2.2 The doctrine of documentary evidence may be explained thus: the onus is on the prosecution to
