CRITERION 1 (20%)

Research-informed Literature Extent of research and/or own reading, selection of credible sources, application of appropriate referencing conventions.

Evidence of basic research on Distributed Database concepts. General discussion about distributed database. Fragmentation was evidenced but it was shown only for one table. Good working on SQL statements.

12

CRITERION 2 (40%)

Knowledge and Understanding of Subject Extent of knowledge and understanding of concepts and underlying principles associated with the discipline.

Demonstrated sufficient knowledge on SQL DDL, DML and DCL language. There are few syntax errors like the 'database' keyword was missing in creating a database. Order of table creation needs revision. Always create the parent entity first and then create child entity.

24

CRITERION 3 (10%)

Analysis Analysis, evaluation and synthesis; logic, argument and judgement; analytical reflection; organisation of ideas and evidence

Analysis could have been improved to gain higher marks.

5

CRITERION 4 (20%)

Practical Application and Deployment Deployment of methods, materials, tools and techniques; application of concepts; formulation of innovative and creative solutions to solve problems.

Necessary constraints were applied while creating the tables. DML statements and user logins were created properly.

15

CRITERION 5 (10%)

Skills for Professional Practice Attributes in professional practice: individual and collaborative working; deployment of appropriate media; presentation and organisation.

Presentation could have been improved.
