Composing for Narrative Film & TV

Composing to a Brief (TV Adverts)

2. Visit Wales

The music for this ad must reflect the attraction and scenery of Wales as a family holiday destination and allude to the celtic history of the country, making it obvious that we are looking at Wales. You will need to try to make the location clear through the music. The music should reflect the joy and natural beauty of the open countryside and the intimacy one feels with it when getting away from it all with the family.
