

Collaborative Learning

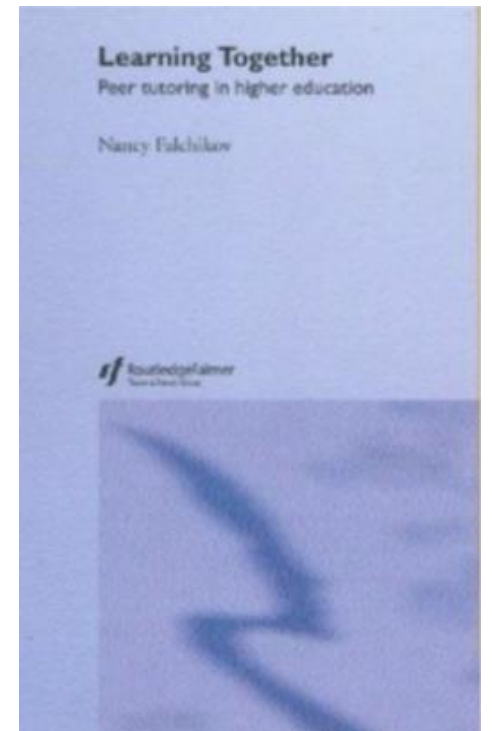

Gabriella Jones- 2404975

What is collaborative learning?

“A situation in which a group of students learn together and have an active role in creating and sharing knowledge” (Maria, 2021)

Examples of collaborative learning:

- Peer assessing
- Brainstorming
- Group discussions
- Group tasks
- Debating
- Case studies

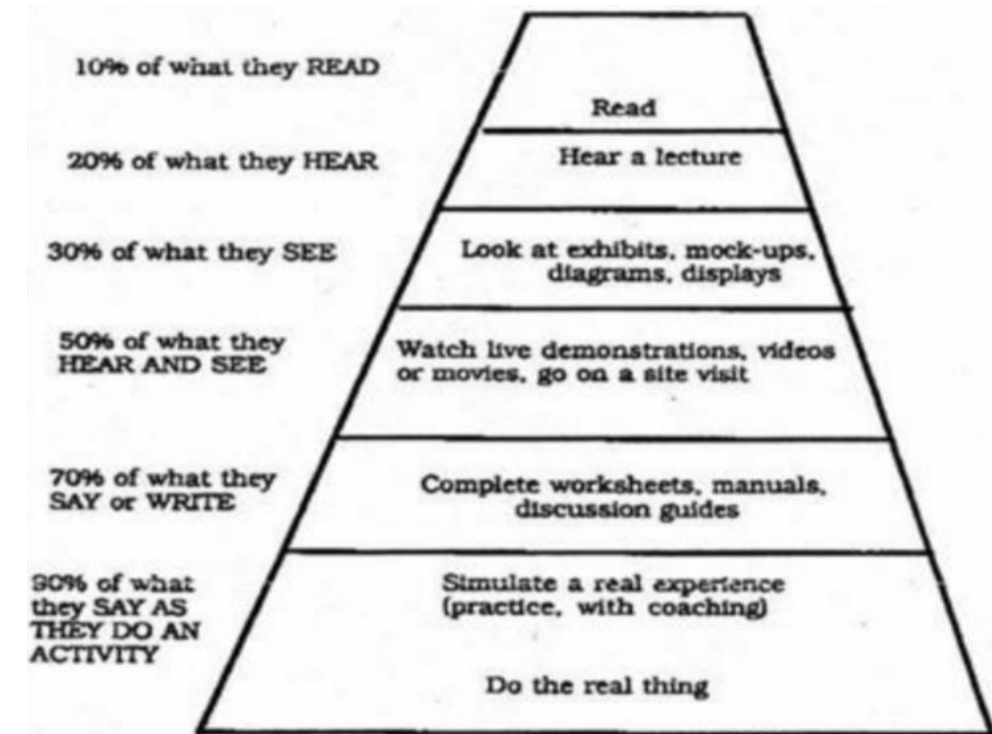

What are the advantages of collaborative learning?

“90% of learners learn the most when they teach it to someone else or employ it directly” (Maine,1954).

Advantages of collaborative learning include:

- Different perspectives
- Boosting competitive nature
- Encouraging open minded thinking
- Inspiring creativity
- Communication
- Being more fun and engaging
- Creating trust
- Gaining experience in teamworking

(Maine,1954)

What are the disadvantages of collaborative learning?

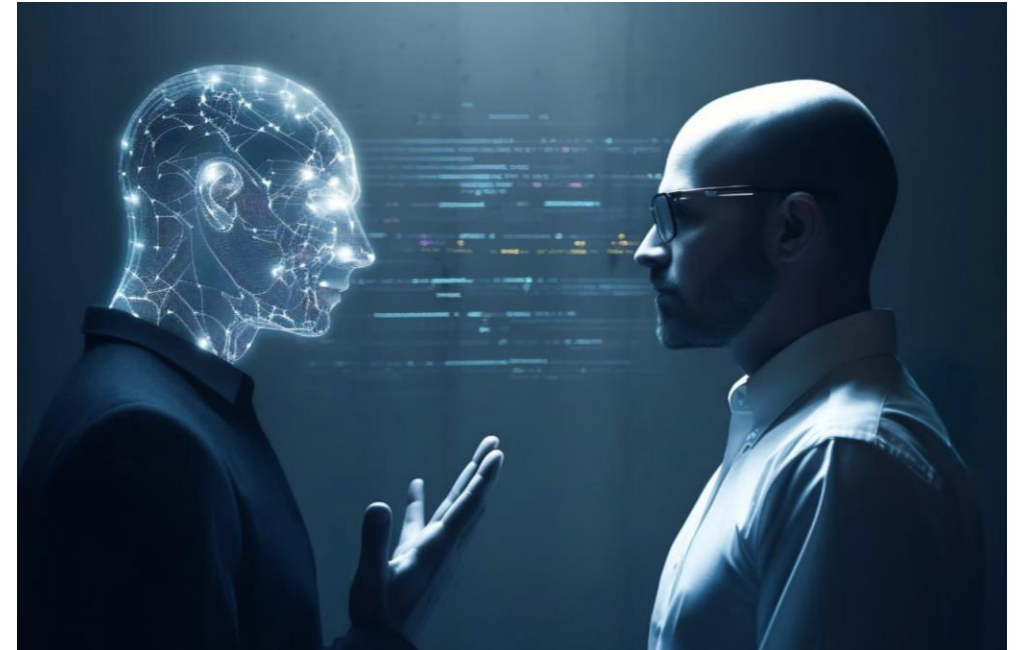

Disadvantages of collaborative learning:

- Unfair contribution
- Conflict
- Interruption
- Different personalities
- Embarrassment
- Individual needs
- Time consuming

What is the future of collaborative learning?

- Artificial intelligence could assist collaborative learning
- Expansion through online games and interactive platforms
- Opportunity for collaborative learning to be offered through blended learning
- Connecting with international students via platforms like Zoom and Microsoft teams.
