JavaScript Assignment

GRADEMARK REPORT

FINAL GRADE

61 / 100

GENERAL COMMENTS

Instructor

WEBSITE

Practical Application and Deployment (70)

Component 1 - Quiz - a bit on the basic side, you could have extended this from the class work more eg more questions, final score etc. The "choose your favourite character" appear to call a javascript function called "comment" but it is missing from the code? 11/20

Component 2 - Image changing is good, I like what you have done with the time and the preloading. The main things I'd say here is that the filesizes of the images are a little large, they need to be compressed to give a good experience on slower connections. 16/20

Component 3 - Colour changer is a bit basic, but nevertheless working OK and uses and array. It's quite close to classwork done and it would have been better if you'd extended to change more parts of the page and so on. 11/20

(60 marks – broadly 20 per component)

- Overall integration of website – Layout is a bit on the basic side and since there are only really 2 pages, it's hard to assess navigation. (10 marks)
5/10

REPORT

Analysis (15) – Analysis of the technical development of your Javascript component.

Nothing in your report which assesses this? There are a few hints in the report which mentions it, but you need more analysis here. Why have you chosen the approach(es) you have and so on 5/15

Knowledge and Understanding of Subject (15) - Annotated code listing. Very good, clearly stated, occasionally not quite detailed enough 13/15

OVERALL MARK: 61%
