PART B

Dear Eilir Owen-Griffiths

I would like to thank you for all your support and help during the past two years on this course, I have tried to act professionally and worked hard to become the person I am today, and none of it could have been possible without your help, and the other tutors who have helped me along the way.

As we both know, I am a bit of a procrastinator, but things turned out to be for the better in the end. I started to actually focus on prioritising important tasks on the course, and in everyday life situations. And it's helped a lot in realising what I want to do in the near future. Ever since a young age, I had a dire aspiration to be able to perform on a stage or be part of a filmed production and the education at this university has been extremely helpful with helping me learn new skills and develop some that I already had. I always struggled with my acting, such as with learning my lines, being able to connect with other characters. But the classes helped a lot with being able to learn the techniques to actually be able to explore more in depth what I can achieve. Especially when we had shows to perform. And I really think that this university has opened my eyes and brought the best out of me. My dancing is now better than ever. I've learned a new dance style which will, hopefully, help me find more jobs in the open world and possibly one day I can help younger aspiring performers to enjoy the style as much as I do. And with my singing, I never knew I had a very broad singing range, singing from a High Tenor voice to be able to sing very low baritone notes, even though it was a struggle at the start, I pushed myself through and here I am.

I do believe that I do deserve this First-Class Degree. Me, as a person, I've never felt more confident in myself, and proud to be able to professionally push through difficult situations and give myself the time to actually do stuff that actually needs to be done as soon as possible. And this course, it's only made me want to push even further. We both know that change is possible if we try and I'm glad to say that I can happily say that it's true, I'm more reliable, efficient, on time, and I do try my best and hardest. When I first thought about coming to this university, I never thought I would ever reach this point in my education and career, and I'm glad to say I'm very proud of myself. I would like to say thank you, for allowing me to learn and develop my future in this university.

Yours Sincerely,

Tomos James Jones
