PROFILE

I asked myself from a young age, what is the reason of existence, and what for everything is created, material or not material, such as energy and information, to have the roots of constantly evolving its energetic mark, or core? Appling this thought process in pursuing a professional career in Automotive and Transport Design Industry my curiosity is to discover the relation between design and existence.

WORK EXPERIENCE

2012-2013

Team Leader Successful Summer Vitamins and Winter Vitamins International project coordinating over 100 students from 6th and 7th grade plus 10 international students to deliver over 20 sessions of multicultural experience.

Known for an interactive teaching style that encourages student participation and enthusiasm while facilitating learning.

2015-Current

Chef/Waiter/Bartender. Since I moved in U.K. I've been fully responsible in sustaining an independent living. Withought loosing my objectives all this experience so far has enrich my determination of becoming a Transport Designer, but at the same time thought me that everything takes time and persistance, enthusiasm and dicipline.

2018-2019

Electric Scooter Live Project. The brief set out by the engineering department of the University, this was our first contact or simulation of how a project is developed from competitive ideation to chosen design, team leader, setting up groups, tasks all under a specific timeframe.

McLaren Live Project. Similar stages as the first one, but this time with a more awariness of creating and developing higher and more professional work.
