Conclusion

I chose WORD because it was ideal to make the new Menu and after watching a short video on the UWTSD Digital Skills website it supported my decision to use WORD.

I've only used WORD a couple of times before, so only had basic knowledge of using it, chose to use this to be better and more experienced at it.

The information for the menu came from an email the owner sent where they required an updated, professional and simple menu. All the products and prices were included in the email.

My initial menu was bland and boring, so I highlighted all the headers and sub-headers in bold and changed the font to Calibri with increase in size to make them stand out from the rest of the menu, changed the colour of the headers and sub-headers to dark green and used a 60% lighter green background to make the menu more appealing, professional, and presentable.

This menu is now updated, professional with a simple look, which will help the customers decide what they would like to eat because it's easier to read, all sections are seperated by different coloured fonts and backgrounds.
