

MARKING CRITERIA and STUDENT FEEDBACK

This section details the assessment criteria. The *extent* to which these are demonstrated by you determines your mark. The marks available for each criterion are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

Common Assessment Criteria Applied	Marks Available	Marks Awarded
1. Engagement with Literature Skills		
2. Knowledge and Understanding Skills		
Considering you have completed the additional lab activities, completing the IP worksheet and addressing table should pose no problem in the scenario - Is this a case of not reading the scenario carefully enough and should have been supported by NetAcad practical activities	10	5
3. Cognitive and Intellectual Skills		
As the scenario has not been successfully, you will not be able to ping the various devices. Remember how to troubleshoot network problems. NetAcad should be a main focus/support when dealing with practical issues	10	0
4. Practical Application Skills		
Although the majority of the scenario has been configured, the main element here is the routing - Can I suggest you revisit this via NetAcad as it will support your understanding. Without the routers being configured - nothing will work	80	29
5. Transferable Skills for Life and Professional Practice		

Assignment Mark (Assessment marks are subject to ratification at the Exam Board. These comments and marks are to give feedback on module work and are for guidance only until they are confirmed.)	Late Submission Penalties (tick if appropriate)		34
	Late Submission ?		
	1st/2nd/3rd attempt?	1st
