Du Yuhui

I'm studying MA visual communication, and the main reason is that I want to be a graphic designer after I graduate from this school.

I think the second reason is because I've been fond of painting pictures for about ten years. I always drew some illustrations if I have free times. And I'm also very fond of many comic books, just like Marvel's book.

I study in MA visual communication. I really like my major because I like design. Studying this course can help me to improve my thinking ability. Design is an interesting process. ~~Complete design~~. When I finish a design, like a poster, I feel very satisfied. Visual design can improve our aesthetic. When people see a beautiful brochure or poster, I said that I can design it by myself. I think it's very cool.
