Comments:

Good slides - maybe you could have zoomed in on some of the data to show the way in which you had to clean the data. You connected ENC and GIS well and you were confident in your description of the software.

Slide content was clear and your conclusion was very good. You demonstrate a sound understanding of the software and the data content. Validity and reliability explained well you demonstrate a good understanding of this. Good overview of literature to paint a picture and open up your talk.

QA all answered well you demonstrated an excellent depth of knowledge.
