PART 2:

1. What is the main idea of the whole text?

The main idea is that BYD has grown very quickly in the electric vehicle market and has now overtaken Tesla to become the biggest EV seller.

2. What is one key point that supports the main idea, and which specific example from the text shows this?

One key point is that BYD's sales are growing very fast. A good example is that BYD's sales increased by 28% and reached more than 2.25 million cars. This shows that the company is becoming stronger in the EV market.

3. What is a different key point that supports the main idea, and which specific example from the text shows this?

Another key point is that Tesla had a difficult year. The text says Tesla sold 1.64 million cars and its sales dropped by 9%. This helps explain why BYD was able to move ahead of Tesla.

4. Which part of the text do you think is most important, and why?

I think the most important part is the comparison between BYD and Tesla's sales. This is important because the numbers clearly show why BYD became the biggest EV seller. It gives strong evidence instead of just giving an opinion.

Reflection:

5. What did you find difficult in this task (including in-class components), and why was it difficult?

I found it difficult to choose the most important points because there was a lot of information in the text. At first, I was not sure which details should go into my notes and which details were less important.

6. What helped you with this difficulty, and how did it help you?

Making a mind map helped me because I could put the main idea in the middle and add the key points around it. Discussing the text in class also helped me understand which facts and examples were **important**.
