

MODULE REVIEW MODULE TUTOR - REPORT FORM

The review of a module is carried out initially by the Module Tutor. When the module review is completed, its findings are considered by the Head of School or Programme Director and noted at the School's Annual Programme Review. Module feedback and what changes will be made as a result of the feedback given are also discussed at Staff Student Consultative meetings. This form is not compulsory but is provided to support the module review process.

Academic Session: Computing and Information Systems
Module Title: Emerging Trends
Module Code: ACCA6019

<u>Student Feedback</u> Number of students registered and eligible to complete the questionnaire: 7 Number of returns: 6 The majority of students found the module intellectually stimulating, clearly structured, well organised and interesting. Similarly, accessibility of information, staff and timeliness of feedback was also positively reported. Nearly all relevant feedback was recorded against "Definitely Agree" or "Mostly Agree". 1 student did not enjoy the unit and registered negative feedback in almost all categories.						
<u>Module Tutor's response to feedback given by students</u> This is a creative module to teach. Students have scope for a wide range of responses which is always pleasant. The projects produced this year were the result of a group effort for the first time which was an interesting change. The groups were able to coordinate a coherent effort and produce successful outcomes in all cases.						
<u>Tutor Self-Reflection</u> The student teams responded well to the nature of the assessment. The group nature of assessment overcame many of the scoping issues encountered when this module was previously conducted as individual projects.
