

Software tester

Come to us and start your adventure with software. Currently we give opportunity get expiries and increases skills for young people who want in future be a Software Tester.

We are working on the project

- test automation
- test environments
- Functional tests
- unit tests
- regression tests
- performance tests
- manual tests

Jira

SoapUI

Jira Software is part of a family of products designed to help teams of all types manage work. Originally, Jira was designed as a bug and issue tracker. But today, Jira has evolved into a powerful work management tool for all kinds of use cases, from requirements and test case management to agile software development. (Jira, n.d.)

SoapUI is a cross-platform functional automation testing tool. SoapUI is free and open source tool and it has been designed to help test APIs such as SOAP and REST interfaces to ensure interoperability of different applications.

Tasks:

- testing new solutions in IT systems,
- creating test cases,
- creating a test plan for individual tasks,
- verification of documentation necessary to perform tests,
- reporting and retesting of defects detected during tests,
- documenting the course of tests,
- reporting the risks associated with the performance of tests and establishing a plan for their mitigation,
- close cooperation with the test coordinator, analysts, business users and other testers in order to ensure the highest quality of software,
- supporting business users in conducting acceptance tests.

SQL

SQL is used to communicate with a database. According to ANSI (American National Standards Institute), it is the standard language for relational database management systems. SQL statements are used to perform tasks such as update data on a database, or retrieve data from a database. (SQL, n.d.)
