STRENGTH

Public speaking & giving presentation

Summarising

WEAKNESSES

Academic Writing

Time management/Organising study

Although these are my strengths and weaknesses , I have learnt to implement my strengths into both my professional and personal life. As for my weaknesses, with tons of practice I have managed to be a bit more efficient in time management and academic writing.

SWOT Analysis

One of my biggest strengths, is public speaking and being able to communicate with people about my work and myself. This gives me the moment to express myself and receive criticism so that I can then progress into further improvements.

On the other hand, my greatest weakness is definitely academic writing. This is due to me struggling with writing without a template. I struggle most because I overthink and stress a lot. This can affect me in the future when it comes to writing follow ups of clients/residents.

Implementation during work

In the future, my main profession would be to be a child social worker which means i would need to be self-assured in my strengths and build on my weaknesses. As a social worker you are expected to have a caring and approachable attitude towards the children and to ensure that a child receives adequate care, education and health care. You would also be expected to note down records of each child.

So that I can attain my job as a social worker, I would need to work on my academic writing and being able to note down the right information without mistakes.

Conclusion

Overall, I will need to continue to focus on my course more and learn and develop a better understanding on what I need to improve and continue doing between my strenght and weaknesses.

Thank you for listening

Any questions????
