

Alin Gheorghita
ID: 2418326

- My name is Alin, and I am the Co-founder of a new business idea. Together with my friends. we are planning to start this company soon. My friends help with creative ideas, plans, and research to make sure the business will be successful. I am very motivated to develop this project and make it real in the future.
- I have always liked beauty and relaxation. My business idea is a spa, because it is something that I really love. I once visited a spa and had a very good experience. It made me want to create my own place where I can get money and people will get happy, powerfull and I will be proud of my self. This inspired me to learn more about spa services and how to make clients feel good.
- I am very passionate about helping people feel relaxed and confident. I believe that taking care of your body and mind is very important. My motivation is to create a spa where people can forget about stress and enjoy a calm moment for themselves. I want to be proud of my self that I did a business and I am making people to forgot about stres.
- I feel connected to the beauty and spa industry because it fits my interests. I like learning about skincare, relaxation, and how to make clients joyfull . This industry is right for me because I enjoy helping people feel better and more confident. In the future, I want to learn more and get experience to make my spa idea real and to be proud of my self.
