

INDEPENDENT PROJECT - Final Report – 55%

Student Name:	James Evans
Title of Project:	Managing Resource Demand.
Supervisor:	Divya Chidambaram
2 nd marker:	Nik Whitehead
Course:	DIS CNC SE CLOUD CSD (please indicate)
Project Type:	Experiment Development (please indicate)

	Mark %
<u>First Marker's General Comments and Original Mark</u>	
<u>Second Marker's General Comments and Original Mark</u> An excellent implementation that shows the hazards of working with real world data. could be strengthened further by a deeper literature review	73
<u>Comment After Consultation With Other Marker & Final Agreed Mark</u>	

Signed:	Nik Whitehead	Date:	12/8/24.
---------	---------------	-------	----------

			Experiment	Development
1. Research-informed Literature				
Introduction			/5	4 /5
Literature Review			/20	8 /15

Comments:

Good introduction with a clear industrial context. Clear aim & objectives with deliverables.
Lit. review: Good introduction. An interesting approach to look at similar sectors. You need to explain diagrams, don't just include and ignore. Too short - under 2500 words.

			Experiment	Development
2. Knowledge and Understanding of Subject				
Methodology			/5	2 /5
Survey Design			-	-
Requirements/Design			-	4 /5

Comments:

Sensible choice of development methodology but no discussion of research methodology and its related elements. Basic level of resourcing.
Good use of MoSCoW. Good requirements identification and design from them.
Database diagrams are too compact to read easily. Some of the material covered here should be in the development section.

			Experiment	Development
3. Analysis				
Results & Discussions			/25	17/25
Conclusions and Recommendations			/10	8 /10
Comments: User testing is good (carried out as part of development) but could be improved by using SUS or UEQ techniques. It would have been useful to get some numbers to show the impact of the project. Good summaries in conclusions.				
			Experiment	Development
4. Practical Application and Deployment				
Development			-	13/15
Experimental Design			/15	-
Comments: Well structured, adhering well to agile approach effectively having to add a set of aggregate tables. Good example of having to change plan priorities. A very good write-up of the development. Good use of examples.				

			Experiment	Development
5. Skills for Professional Practice				
Reflection			/10	9 /10
Quality of Report			/10	8 /10
Comments: Abstract is a little long but otherwise good. Contents table needs to go to 2 layers of sub headings. The introduction should be chapter 1. Over all, though, this is an extremely well written and well presented report. Very strong reflection. The project is clearly an excellent case study for "good business idea meets real-world data". :)
