DIGITAL SAFETY

1

INTRODUCTION

It is what we call the appropriate approach to personal safety when using digital technologies. Online Safety is being aware of the nature of the possible threats that you could encounter whilst engaging in activity through the Internet.

2

tips

- 1.do not share personal information*
- 2.double check and verify links*
- 3.use a vpn*
- 4.turn off your bluetooth*
- 5.use anti virus software*

3

CONCLUSION

in conclusion you dont have to be scared to use social media or electronic devices ,there are plenty of antivirus software and tools such as norton,secure vpn and mc afee that you can use to protect your device.
