

Chronological Approach

(Please read your assessment specification fully prior to using this guidance. This document is for guidance only and should not be treated as complete instructions. A title slide and full reference slide must also be included in your final work).

This structure traces the **evolution** of the digital innovation over time, from development to implementation and impact. It provides a **narrative** of how the technology became a game-changer in health and social care.

Introduction: Origins of the Innovation

. Introduction: Origins of the Innovation (1 minute)

- Present the historical context—what problem the innovation was designed to solve and when development began.

Development Stage

Development Stage (2 minutes)

- Describe the early stages of development, pilot programs, and initial studies that tested the innovation's effectiveness (e.g., early trials of telemedicine).

Implementation Stage

Implementation Stage (3 minutes)

- Explain when and how the innovation was first introduced in health and social care systems.

- Discuss key milestones—training staff, overcoming initial challenges, and scaling the technology.

Current Impact and Future Projections

Current Impact and Future Projections (3 minutes)

- Present current data on how the innovation has changed the workforce, service delivery, patient experiences, and community outcomes.
- Discuss ongoing improvements, future trends, and how the technology might evolve further.

Conclusion

Conclusion (1 minute)

- Recap the innovation's journey and its lasting impact on health and social care.
- End with a forward-looking statement on where the innovation could take the industry in the next decade.
- Summarise the main value of your research.
