

ARCHITECTURE STUDIO 1A

TASK 3 **WINDOW** PART TWO

This is the second stage of the window exercise. You are asked to make scale drawings of the window surveyed in the first part of the exercise.

As before you will use a “double page spread” in your logbook.

You should use the following drawings

- Scale plan showing the window and the ADJOINING/neighbouring wall
- Scale section showing head, cill and all intermediate elements
- Internal or external elevation showing the immediate surroundings
AND
- Sketch that captures the character of the window

The first three should be drawn to a scale that allows all the drawings to fit comfortably on the page. All should be drawn **freehand**
