SKETCH FAB REFERENCES

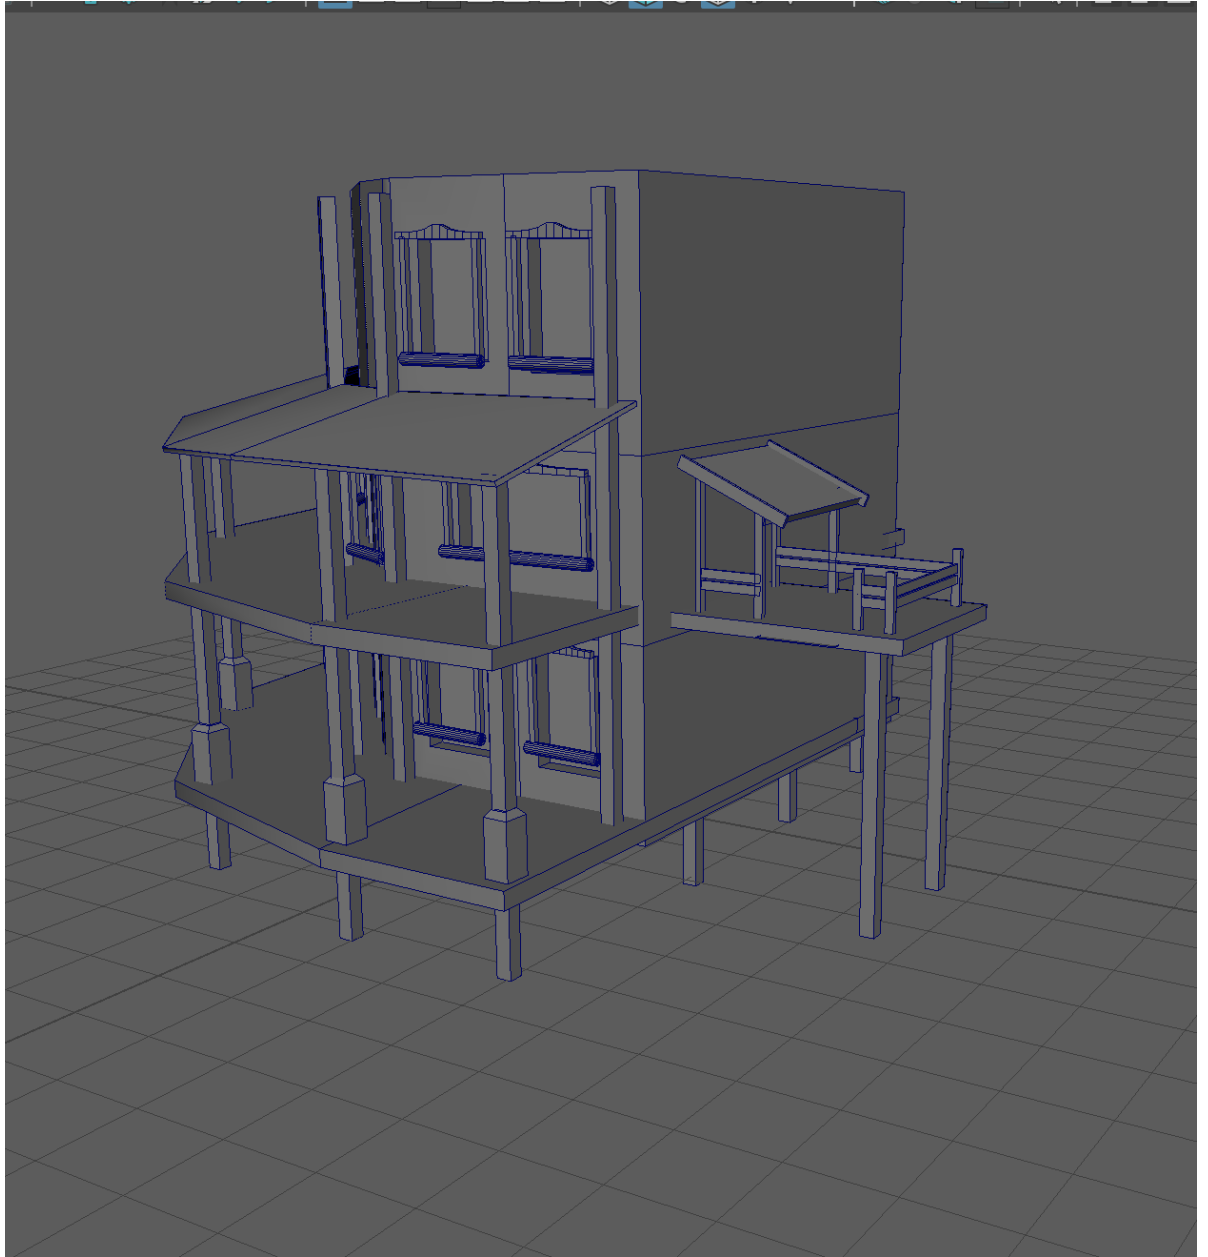

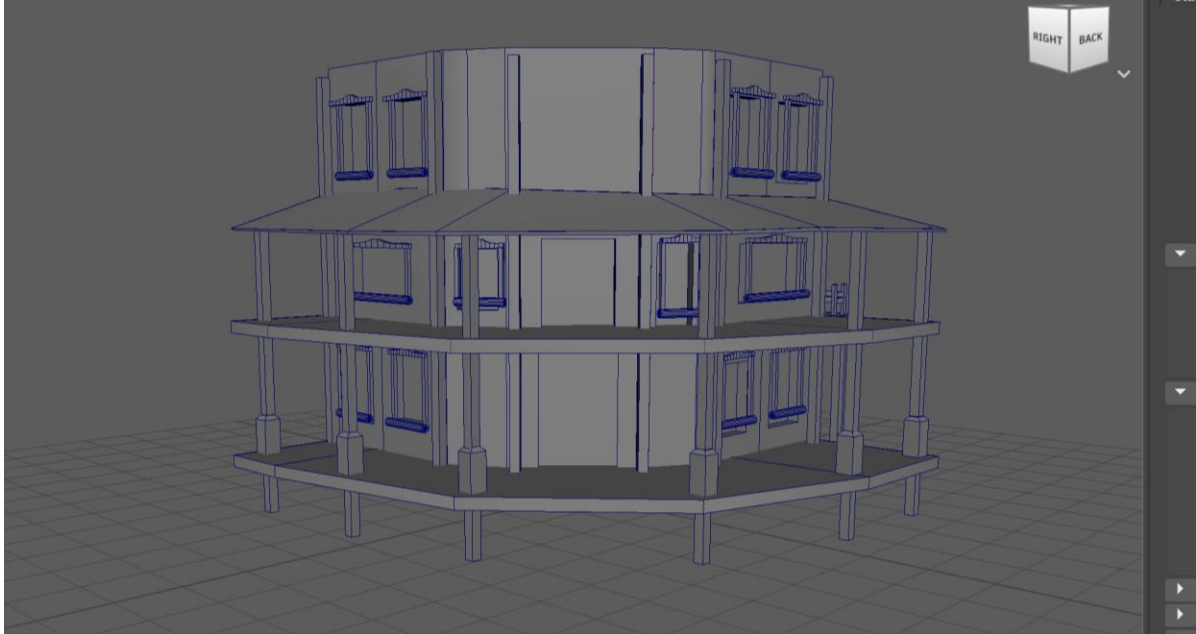

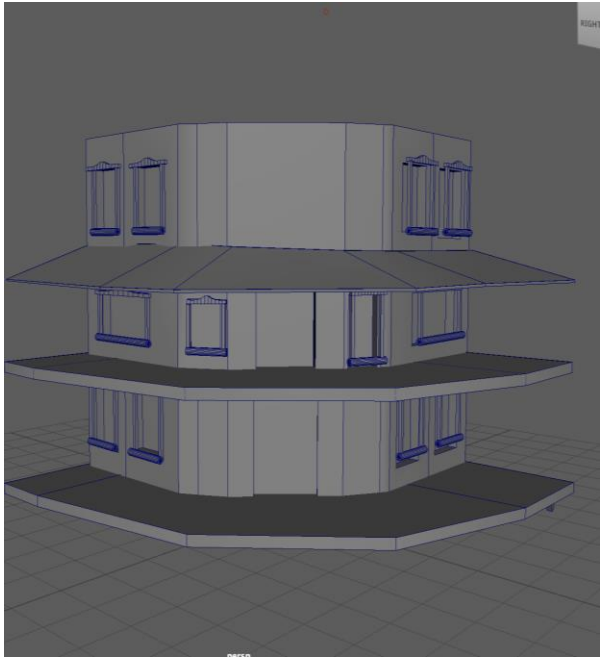

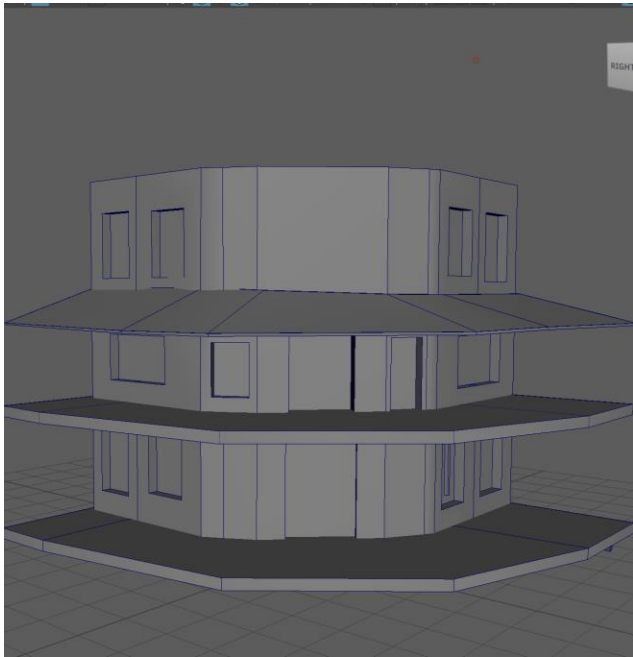

- For my environment Design, I wanted to create a saloon, Due to the lack of references or examples of our environment, I decided to play it safe and just create a good and detailed model of a saloon, to show acknowledgement of the time the model would be in.
- If It to appear as if from the 1800s the wood would be new and fresh. However, if I wanted it to be further into the future, the wood would be broken or decaying
