

LEVEL 6 ASSESSMENT SPECIFICATION

Student name:		Student ID number:	
Programme:	Construction Portfolio		
Module:	Integrated Group Project		
Module code:	ACBA 6003	Contribution to Overall Module Assessment (%):	100%
Lecturer:	Gavin Traylor, Allan Nantel, Deborah Hughes, Shaker Bitar	Internal Verifier:	Allan Nantel
Assignment Title:	Project	Word count (or equivalent):	Compiled Document - Lever Arch File / PDF
Submission deadline:	Final Submission 3 rd May 2023	Return date of provisional marks	26 th May 2023
Submission method:	All written assessments, where practical and possible, must be submitted via Turnitin unless otherwise instructed by the Lecturer. (Please DO NOT put this assessment specification into Turnitin or it will match many similarities with other students' submissions.) Alternative submission method (if applicable): Late submission of the assessment will result in a late penalty mark. Penalties for late submission: Up to one week late, maximum mark of 40%. Over one week late, 0%. Only the Extenuating Circumstances Panel may approve a change to submission dates.		
Academic honesty / referencing:	Academic honesty is required. In the main body of your submission you must give credit to authors on whose research and ideas your work is based. Append to your submission a reference list that indicates the books, articles, etc. that you have used, cited or quoted in order to complete this assessment.		

Module Learning Outcomes (from module syllabus)

1. Work as a cohesive team to produce an effective project.
2. Produce all necessary evidence, specifications, records, documentation to demonstrate understanding of process and procedure in the production of a Project.
3. Appraise the environmental impact of design and produce sustainable solutions in design and construction method and material choice.

TASK DESCRIPTION

The SA1 Development is central to UWTSD's future plans. In consideration of this, the University has established some priorities, with the intention of considering different proposals from companies and evaluating these according to the University's immediate necessities.

The university has selected a team who will represent the client's interests for the duration of a joint project with Welsh Government support through the City Deal. In line with Welsh Government Digital Strategy for Wales, **Building Information Modelling / Information Modelling (Civils)** is a key deliverable, and the client wishes you to consider this process from the inception of the project. An outline EIRs shall be provided to assist you in developing the project in this respect.

Your objective in this module is to establish, develop and present a full and competent proposal for the University to **ONE** of the options listed below. You must work as a project team of a maximum of 5 persons to facilitate successful compilation of all necessary documentation to this end, in designing, programming, costing and presenting your proposal.

Some initial conditions are as follows: - These projects should be completed and operational in August of 2024, so you have a 22-month window from inception to completion.

An important consideration of the University in selecting the project for construction is **sustainability and innovation**. The project team should make full consideration of the environmental impact of their solution.

You have to include these criteria within your project proposal. –

A plan of the site will be distributed to each group allocating a plot position (where necessary), via Moodle / Teams

Your final collaborative document, as a guidance and not limited to, should consider the following;

1. Introduction
 - a. The need
 - b. Location –
 - c. Constraints –
 - d. Ground Investigation

- e. EIA
 - f. Feasibility study
 - g. BIM Strategy / capabilities
2. Design aspects with sustainable solutions
- a. BIM Execution Plan in response to EIRs
 - b. Environmental factors
 - c. Energy
 - d. Social aspects
 - e. Economic comparisons for the Client
 - f. Aesthetics
 - g. Method Statement
 - h. H+S risk assessment
 - i. Full schedule of Works
 - j. Distribution of labour and resources (materials and equipment) along time, with specific milestones
 - k. Cash-flow forecast analysis
 - l. Site layout at different stages of works
 - m. Technical and Non-Technical specifications
 - n. Material costings with comparisons
 - o. Summary Project Costings
 - p. Foundations substantiation
3. A schematic to highlight your solutions in drafts and final drawings
- a. Existing and Proposed Plans
 - b. Principal Elevations
 - c. Cross sections
 - d. Call out details
4. Construction materials and methods
- a. Identify the different materials and/or components used, considering material options
 - b. Identify the construction methods and machinery used
 - c. Justifications of selections

POTENTIAL PROJECTS – CONSTRUCTION COHORTS

CHOOSE ONE OF THE FOLLOWING PROJECTS:

PROJECT A:

To meet the growing number of home and overseas students wishing to attend the University, additional Halls of Residence are required. Your company have been approached by the Universities Estates Team to carry out the design and build for a new three-storey Student Residence Hall in the SA1 development (seafront): the top two floors will be for student accommodation, and the ground floor will be multifunctional start up business units. The University would prefer the student rooms to be 'en-suite'. Consideration should be given to maximising rental income generation from these units (inside and outside of term time), to access, and to diversity in provision, allowing for single and family units to be incorporated, therefore maximising the monetary possibility of space. It is essential that consideration must be given to proper access to all areas for all users (including those with disabilities) and to safe delivery to the business units. The plot area not utilised for the building should be fully landscaped for community use. Consideration should be given to parking, sustainable transport and rechargeable vehicles. (SITE PLOT E9)

PROJECT B:

The vision of the University covers sport as one of the priorities for the new development. The vision is to build an enclosed Olympic sized swimming-pool and leisure complex, with all the required facilities for it to provide swimming and other related water sports. Additionally, the final design will include all necessary sanitary and changing facilities for the pool and other open air sports (rugby / football ground and 5 tennis courts) that should be provided adjacent.

Inclusivity is a key requirement and consideration should be given to facilities that actively encourage parasports. Consideration must be given to an energy efficient delivery for heating, lighting, drainage and ventilation to this building. The grounds should be landscaped for community use. Consideration should be given to parking, sustainable transport and rechargeable vehicles. (SITE PLOT F)

PROJECT C:

A landmark learning/lecture hall building is needed for the large number of lectures to be undertaken during term time. The estimation is that 10 lecture rooms for 30 students and 4 lecture theatres for 80 students are required over three floors. Additionally, there is the need for including one tiered lecture theatre to hold 300 people. The proposal should include all facilities for these activities, such as an entrance hall and reception area, toilets, storing and printing room and central open meeting areas and cafeteria. Consideration should be given to specific acoustic requirements for each room. Consideration should be given to the possibility of the renting out of these spaces for conferences/seminars outside term times. The construction on the building should aid to the education process, with the use of innovative technologies and sustainable materials. The grounds should be environmentally landscaped for community use and provided greater biodiversity. Consideration should be given to parking, sustainable transport and rechargeable vehicles. (SITE PLOT E8)

PROJECTS – CIVIL ENGINEERING COHORT

CHOOSE ONE OF THE FOLLOWING PROJECTS:

PROJECT A:

With reference to the trace given in Figure 1 above, the proposal is to build a road to join the two intersections circled, to ease traffic flow to and from the University site. You are required to propose a bridge solution to cross River Tawe at a suitable location. You will need to consider solutions to cross the railway line. Different solutions should be explored and presented (e.g. tunnelling or flying bridge) but you need to justify your final decision comparing aspects such as complexity of technical solutions, material choices, costing, environmental impact, disruption and aesthetics.

PROJECT B:

To meet the desired access requirements of the pedestrian traffic anticipated within the new development, your company is required to provide road access at the Langdon road roundabout (adjacent to Beacon Health Centre) to the Prince of Wales Dock, and a pedestrian foot bridge crossing this dock from the plot site A14B to the plot B5. This bridge should be innovative in aesthetic and a landmark structure, it is also required to be have a design inspired by the industrial heritage of the city.

It is also required that this footbridge is illuminated at nightfall. You are also required to provide walkway-linked moorings for the berthing of 60 motorboats on the eastern side of this bridge, within the Prince of Wales dock.

PROJECT C:

To meet the desired access requirements of the pedestrian traffic anticipated within the new development, your company is required to provide road access in to the SA1 development from an access point in the vicinity of Wern Terrace from Fabian's Way (A438) to the point of the dock crossing at Roberts road. The route chosen must consider best access, capacity of traffic, disruption to local business in the retail park on the eastern end of Langdon road, traffic control points, innovative possible approaches to highway materials utilised and drainage solutions. Access must be provided to the anticipated multi-storey vehicle parking site at Plot F. You are also tasked with replacing the lock gates adjacent to plot C6, which have fallen into disrepair, to allow access for motor boats into the Prince of Wales dock from the main river mouth. These gates should replicate those found in Swansea's Marina.

All written work should be supported by: photographs, drawings/sketches and specifications, together with the scale **or** virtual model of the proposed building / structure.

Where group meetings, or meetings with the University's appointed personnel, have taken place, minutes should be taken by a group member for inclusion into the final submission. The group will be asked to meet the Client regularly (on a 2/3 week cycle) to update Project progress. **Dates for these meetings will be communicated to the group by the Client.**

The completed project will be presented to members of the academic staff via power point presentation viva, all members of the group participating equally.

NOTE: All members of the group will be individually assessed.

The final written submission is to be presented in a lever arch and individual online submission (or similar) file(s), with the name and role of each member clearly identified alongside work submitted, and summarised on a front sheet.

NOTE: Be aware that the Client may issue variations to the requirements for the project at any stage.

Individual Assessment

You will be required to present an individual report following submission of the Project Lever Arch file (s) **evaluating your own performance (with possible improvement) and (anonymously) the performance of other group members.**

Assessment dates:

1. An **INDIVIDUAL Interim Viva** in mid-January 2023 (10%), highlighting individual group members progress to date on work allocated to them.
2. Written Course work submitted within the project file and individually via Moodle on or before Friday 28th April 2023 (65%) latest, with individual contributions clearly indicated.

Note: 25% of this total mark of 65% will be deemed 'Practical Application Skills', which will be assessed individually at Client / Group meetings throughout both Semesters, in response to work both progressed and pending for that individual.

3. Final Viva presentation with contribution from ALL group members in mid-May 2023 (25%)

(Final dates for the Viva Presentations to be confirmed)

GUIDANCE FOR STUDENTS IN THE COMPLETION OF TASKS

NOTE: The guidance offered below is linked to the five generic assessment criteria overleaf.

Your submission must contain / demonstrate:

- Content is succinct with relevant information, fully detailed and referenced.
- Logical and coherent structure;
- Clear understanding of key issues and concerns
- Collaborative working.

1. Engagement with Literature Skills

Your work must be informed and supported by scholarly material that is *relevant* to and *focused* on the task(s) set; you should make use of scholarly reviews and primary sources, where appropriate (for example, refereed research articles and/or original materials appropriate to the discipline). You should provide evidence that you have accessed a wide *range* of sources, which may be academic, governmental and industrial; these sources may include academic journal articles, textbooks, current news articles, organisational documents, and websites. You should consider the *credibility* of your sources; academic journals are normally highly credible sources while websites require careful consideration/selection and should be used sparingly. Any sources you use should be current and up-to-date, mostly published within the last five years or so, though seminal/important works in the field may be older. You must provide *evidence* of your research/own reading throughout your work, using a suitable referencing system, including in-text citations in the main body of your work and a reference list at the end of your work.

Guidance specific to this assessment:

2. Knowledge and Understanding Skills

At level 6, you should be able to demonstrate coherent and detailed knowledge and a systematic understanding of the subject area, at least some of which is informed by the latest research and/or advanced scholarship within the discipline. You should be aware of the uncertainty, ambiguity and limits of knowledge. Your work must demonstrate the growing extent of your knowledge and systematic understanding of concepts and underlying principles associated with the subject area. *Knowledge* relates to the facts, information and skills you have acquired through your learning. You demonstrate your *understanding* by interpreting the meaning of the facts and information (knowledge). This means that you need to select and include in your work the concepts, techniques, models, theories, etc. appropriate to the task(s) set. You should be able to explain the theories, concepts, etc. meaningfully to show your understanding. Your mark/grade will also depend upon the *extent* to which you demonstrate your knowledge and understanding; ideally each should be complete and detailed, with comprehensive coverage.

Guidance specific to this assessment:

3. Cognitive and Intellectual Skills

You should be able to: critically evaluate evidence, arguments, assumptions, abstract concepts and data some of which are at the forefront of a discipline (and that may be incomplete) to devise and sustain arguments, to make judgements and/or solve problems; describe and comment upon particular aspects of current research, or equivalent advanced scholarship, in the discipline Your work must contain evidence of

logical, analytical thinking, evaluation and synthesis. For example, to examine and break information down into parts, make inferences, compile, compare and contrast information. This means not just describing what! But also justifying: Why? How? When? Who? Where? At what cost? At all times, you must provide justification for your arguments and judgements. Evidence that you have reflected upon the ideas of others within the subject area is crucial to you providing a reasoned and informed debate within your work. Furthermore, you should provide evidence that you are able to make sound judgements and convincing arguments using data and concepts. Sound, valid conclusions are necessary and must be derived from the content of your work. Where relevant, alternative solutions and recommendations may be proposed.

Guidance specific to this assessment:

4. Practical Skills

At level 6, you should be able to apply the methods and techniques that you have learned to review, consolidate, extend and apply your knowledge and understanding, and to initiate and carry out projects. You will deploy accurately established techniques of analysis and enquiry relevant to the discipline, and apply them in complex and unpredictable contexts, to devise and sustain arguments and/or to solve problems. You should be able to frame appropriate questions to achieve a solution - or identify a range of solutions. You should be able to demonstrate how the subject-related concepts and ideas relate to real world situations and/or a particular context. How do they work in practice? You will deploy models, methods, techniques, and/or theories, in that context or circumstances, to assess current situations, perhaps to formulate plans or solutions to solve problems, or to create artefacts, some of which may be innovative and creative. This is likely to involve, for instance, the use of real world artefacts, examples and cases, the application of a model within an organisation and/or benchmarking one theory or organisation against others based on stated criteria. You should show awareness of the limitations of concepts and theories when applied in particular contexts.

Guidance specific to this assessment:

5. Transferable Skills for Life and Professional Practice

Your work must provide evidence of the qualities and transferable skills necessary for graduate-level employment requiring the exercise of initiative and personal responsibility and decision-making in complex and unpredictable circumstances. This includes demonstrating: the learning ability for professional development to advance existing skills and acquire new competences of a professional nature that will enable you to assume significant responsibility within organisations; that you can initiate and complete tasks and procedures, whether individually and/or collaboratively; that you can use appropriate media to effectively communicate information, arguments and analysis in a variety of forms to specialist and non-specialist audiences; fluency of expression; clarity and effectiveness in presentation and organisation. Work should be coherent and well-structured in presentation and organisation.

Guidance specific to this assessment:

STUDENT FEEDBACK FORM

This section details the *extent* to which the assessment criteria are demonstrated by you, which in turn determines your mark. The marks available for each category of skill are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

Generic Assessment Criteria	Marks available	Marks awarded
1. Engagement with Literature Skills	10	
2. Knowledge and Understanding Skills	20	
3. Cognitive and Intellectual Skills	30	
4. Practical Application Skills	25	
5. Transferable Skills for Life and Professional Practice	15	

Assessment Mark (Assessment marks are subject to ratification at the Exam Board. These comments and marks are to give feedback on module work and are for guidance only until they are confirmed.)	Late Submission Penalties (tick if appropriate)		%
	Up to 1 week late (40% Max)		
	Over 1 week late (0%)		

GENERIC ASSESSMENT CRITERIA

Level 6

In accordance with the Framework for Higher Education Qualifications, at the end of Level 6 students should have coherent and detailed knowledge and a systematic understanding of their subject area, at least some of which is informed by the latest research and/or advanced scholarship within the discipline. They will be able to accurately deploy established techniques of analysis and enquiry within a discipline, using their conceptual understanding to devise and sustain arguments and/or to solve problems. They should be aware of the uncertainty, ambiguity and limits of knowledge. They should be able to critically evaluate evidence, arguments, assumptions, abstract concepts and data (that may be incomplete), to make judgements, and to frame appropriate questions to achieve a solution - or identify a range of solutions. They will apply the methods and techniques that they have learned to review, consolidate, extend and apply their knowledge and understanding, and to initiate and carry out projects. They will have the ability to manage their own learning, and to make use of scholarly reviews and primary sources (for example, refereed research articles and/or original materials appropriate to the discipline). They will demonstrate the qualities and transferable skills necessary for employment requiring: the exercise of initiative and personal responsibility; decision-making in complex and unpredictable contexts; the learning ability needed to undertake appropriate further training of a professional or equivalent nature.

Level 6	FAIL	MARGINAL FAIL	SATISFACTORY (3 rd / Pass)	GOOD (2.2 / Pass)	VERY GOOD (2.1 / Merit)	EXCELLENT (1 st / Distinction)	EXCEPTIONAL (1 st / Distinction)
Category	0-29%	30-39%	40-49%	50-59%	60-69%	70-84%	85-100%
Engagement with literature (including reading, referencing, academic conventions and academic honesty)	Little or no evidence of reading and/or reliance on inappropriate sources. Views and findings mostly unsupported and non-authoritative. Referencing conventions used incoherently or largely absent.	Poor engagement with essential reading. No evidence of wider reading. Reliance on inappropriate sources, and/or indiscriminate use of sources. Heavily reliant on information gained through class contact. Inconsistent and weak use of referencing.	Engagement with a limited range of mostly relevant and credible sources. Some omissions and minor errors. Referencing conventions evident though not always applied accurately or consistently.	Engagement with an appropriate range of research-informed literature, including sources retrieved independently. Some over-reliance on texts. Referencing may show minor inaccuracies or inconsistencies.	Engagement with a wide range of research-informed literature, including sources retrieved independently. Selection of relevant and credible sources. Very good use of referencing, with no/very few inaccuracies or inconsistencies.	Engagement with an extensive range of relevant and credible literature, informed by the latest research. Consistently accurate application of referencing.	Exceptional engagement with an extensive range of relevant and credible literature, informed by the latest research. High-level referencing skills consistently and professionally applied.
Knowledge and understanding (Coherent and detailed)	Major gaps in knowledge and systematic understanding of the subject	Gaps in knowledge, with only superficial systematic understanding.	Limited knowledge and systematic understanding of the relevant	Knowledge is reasonably detailed, accurate with a good systematic	Knowledge is reasonably extensive coherent and detailed.	Excellent coherent and detailed knowledge and systematic	Exceptionally coherent and detailed knowledge and systematic

Level 6	FAIL	MARGINAL FAIL	SATISFACTORY (3 rd / Pass)	GOOD (2.2 / Pass)	VERY GOOD (2.1 / Merit)	EXCELLENT (1 st / Distinction)	EXCEPTIONAL (1 st / Distinction)
Category	0-29%	30-39%	40-49%	50-59%	60-69%	70-84%	85-100%
knowledge and systematic understanding of the subject area, at least some of which is informed by the latest research and/or advanced scholarship within the discipline.)	matter. Substantial inaccuracies. No awareness of knowledge of the latest research and/or advanced scholarship within the discipline.	Some significant inaccuracies and/or irrelevant material. No awareness of knowledge of the latest research and/or advanced scholarship within the discipline.	concepts and principles within the subject area which to some limited extent, is informed by current research and scholarship.	understanding of the field of study and to some extent, current research and scholarship.	Exhibits very good understanding of the breadth and depth of established views, and the work is, at least in part, well-informed by current research and scholarship.	understanding of the principles and theories of current research and scholarship. Clear awareness of challenges to established views and the limitations of the knowledge base.	understanding of the principles and theories of the subject, well-informed by current research and scholarship. A critical, sophisticated and nuanced awareness of the ambiguities and limitations of knowledge.
Cognitive and intellectual skills (Conceptual and critical thinking, analysis, synthesis and evaluation of research, assumptions, abstract concepts and data (that may be incomplete); logic, argument and judgement.)	Wholly or almost wholly descriptive work. Little or no analysis, synthesis or evaluation. Failure to develop arguments, leading to illogical or invalid judgements. Unsubstantiated generalisations, made without use of any credible evidence.	Largely descriptive work, with superficial use of critical evaluation. Weak development of arguments and judgements. Information accepted uncritically, uses generalised statements made with scant evidence and unsubstantiated opinions. Ideas sometimes illogical and contradictory.	Limited attempt at critical thinking, analysis, synthesis and evaluation, tending towards description. Some evidence to support emerging arguments and judgements but these may be underdeveloped or with a little inconsistency / mis-interpretation. Asserts rather than argues a case.	Some critical thinking, analysis, synthesis and evaluation. Can analyse new and/or abstract concepts and data without guidance. An emerging awareness of different stances and ability to use evidence (that may be incomplete) to support the argument. Mostly valid arguments and logical judgements. Some tendency to assert/state opinion rather than argue on	Sound critical thinking, analysis, synthesis and evaluation demonstrating critical thinking. Ability to devise and sustain persuasive arguments, and to review the reliability, validity and significance of evidence (that may be incomplete) to make mostly appropriate and valid judgements.	Excellent critical thinking, analysis, synthesis and evaluation. Ability to investigate contradictory or incomplete information and make strong, persuasive, arguments and sophisticated judgements. Some evidence of independent thought and ability to 'see beyond the question', suggesting a grasp of the broader field and wider concepts.	Exceptional critical thinking, analysis, synthesis and evaluation based on judiciously selected evidence. Ability to investigate contradictory or incomplete information and make strong, persuasive, arguments and sophisticated, nuanced, judgements. Evidence of independent thought and ability to 'see beyond the question', suggesting an outstanding

Level 6	FAIL	MARGINAL FAIL	SATISFACTORY (3 rd / Pass)	GOOD (2.2 / Pass)	VERY GOOD (2.1 / Merit)	EXCELLENT (1 st / Distinction)	EXCEPTIONAL (1 st / Distinction)

				the basis of reason and evidence.			grasp of the broader field and wider concepts.
Practical skills (Apply/deploy accurately established tools and techniques; initiate and carry out projects; formulate solutions to solve problems in complex and unpredictable contexts.)	Limited or no use of methods, materials, tools and/or techniques. Little or no appreciation of the context of the application. Limited understanding of the application of theory to practice or making appropriate links between the two. Very weak problem-solving skills in complex and unpredictable contexts.	Rudimentary application of methods, materials, tools and/or techniques but without consideration and competence. Flawed appreciation of the context of the application. Weak understanding of the application of theory to practice, with only occasional evidence of making appropriate links between the two. Weak problem-solving skills in complex and unpredictable contexts.	An adequate awareness and mostly appropriate application of well-established methods, materials, tools and/or techniques. Basic appreciation of the context of the application. Theoretical knowledge and understanding applied in practice, but not always making logical links between the two. Can identify problems and propose basic solutions in complex and unpredictable contexts without fully appreciating the complexity.	A good and appropriate application of standard methods, materials, tools and/or techniques. Clear appreciation of the context of the application. Mainly consistent, accurate and logical application of theory to practice, making appropriate links between the two. Can identify problems and propose mostly appropriate solutions in complex and unpredictable contexts.	A very good application of a range of methods, materials, tools and/or techniques. Very good consideration of the context of the application, with perceptive insights. Can identify problems and propose appropriate solutions in complex and unpredictable contexts. Evidence of some innovation and creativity.	An advanced application of a range of methods, materials, tools and/or techniques. The context of the application is well considered, and insightful. Application and deployment extend beyond established conventions. Can identify complex problems and propose excellent solutions. Innovation and creativity evident.	Exceptional levels of application and deployment skills in unpredictable, practical contexts, drawing skilfully on the latest research within the discipline. Can identify complex problems and propose sophisticated solutions. Assimilation and development of cutting edge processes and techniques.
Transferable skills for life and professional practice (Exercise of initiative and	Communication medium is inappropriate or misapplied. Work is poorly structured, disorganised	Communication medium is poorly designed and/or not suitable for the audience. Work is poorly presented in a	Can communicate in a suitable medium but with some room for improvement. Mostly ordered	Can communicate effectively in a suitable format, but may have minor errors. Mostly coherent,	Can communicate well, confidently and consistently in a suitable format. Work is	Can communicate professionally confidently and consistently in a suitable format. Work is	Can communicate with an exceptionally high level of professionalism. Work is
