

BASIC DIGITAL SAFETY

MODULE NAME: DIGITAL SKILLS

MODULE CODE: LCLM4002

NAME: DANIEL FLORIN BRUTU

ID NUMBER: 2328036

GROUP: 4

PROTECTING YOUR DEVICE

- A perfect example of basic digital skill is when your computer sometimes it get stuck and a perfect mistake which the hacker is waiting for is made by many people which is unplugging their computer because all the antivirus programs are down so he can easily access your personal information, an easy and secure fix would be to unplug your INTERNET cable and plug it back in because your antivirus program will still be active to protect your personal information.

PROTECTING YOUR PERSONAL DATA

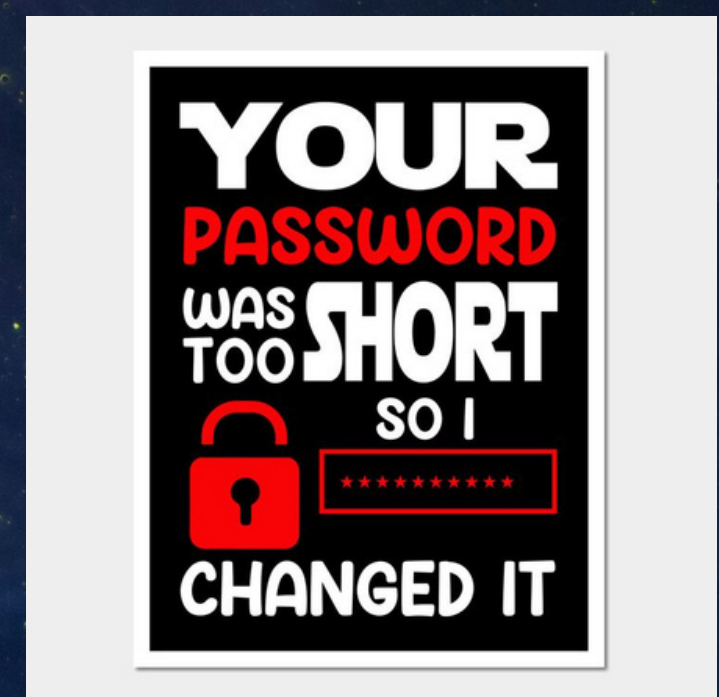

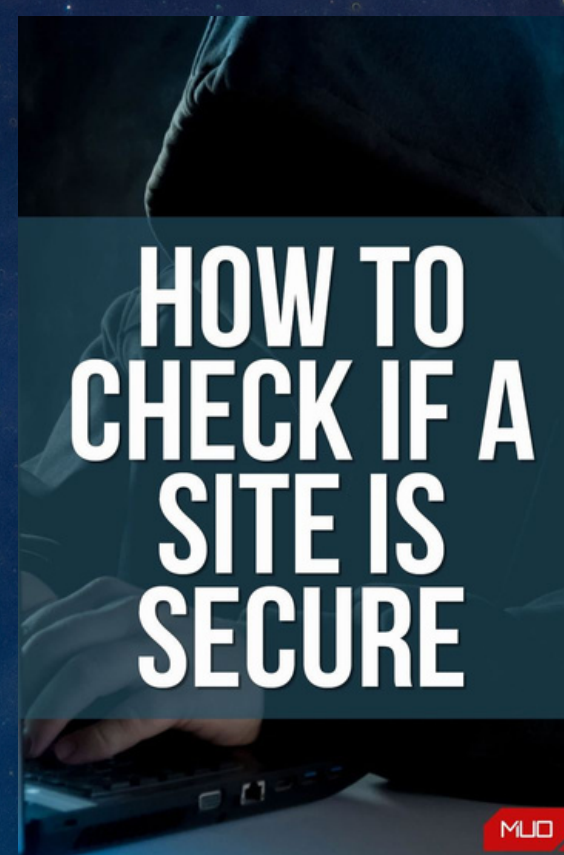

- Sometimes without realizing many people are posting even their personal information and what we need to pay attention is how much of the information we sharing because every time we are online that means we are exposed .

BECOME CRITICAL WHEN ACCESSING WEBSITES AND NEW INFORMATION

- It is really important when navigate to be safe , to know that we are not exposed to any threats, so for that we can always check before we access a new information or before accessing a new website if is safe or not at:

www.getsafeonline.org

- IDEALLY : When creating a password have you notice that must of the websites or banks ask you to use a minimum certain of characters ,an upper case letter and a number? that is because they want to make sure that no one can guess it and from time to time to be changed this is basically to maintain the level of security for your accounts
