

Safety First!

Professional mechanics are trained in safe working procedures. However enthusiastic you may be about getting on with the job at hand, take the time to ensure that your safety is not put at risk.

A moment's lack of attention can result in an accident, as can failure to observe simple precautions.

There will always be new ways of having accidents, and is important to encourage a safe approach to all work you carry out on the engine.

Step 1:

To be able to work on the engine we decided first remove the oil pan. By removing the oil pan we could leave the engine in a good position to disassemble the rest of the engine.

• Items Removed

- 1x Valve relief
- 16x Bolt - Flanged 6x25 mm
- 1x Pan oil
- 1x Gasket 12x22x3 mm
