

Protecting your Accounts and Devices

With these few easy steps.

1

IDENTIFY HOW YOU MAY BE TARGETED

- Phishing scams: that trick you into clicking.
- Scam messages with links to websites that install viruses onto computer, or steal passwords.
- That can happen by texts, emails, or even phone number collecting informations (such as bank details and passwords), or even the access to your computer.

2

LOOK AT WAYS OF PROTECTING YOUR ACCOUNTS:

- Use complex passwords.
- Enable two-step verification on your accounts.
- Review your social media usability and set-up.
- Review your messaging app.

3

FOLLOW WAYS OF PROTECTING YOUR DEVICES

- Install updates.
- Use a password manager or save passwords in your browser.
- Erase data from old devices and always changes your security settings.
- Protect physical access.
