What is my research question?

- How do Adverse childhood experiences link with future outcomes?

What is my rationale?

- Why am I doing it?

What is Adversity?

- Adverse childhood experience ACE's are potentially traumatic events or situations that happen during childhood or adolescence.

Maltreatment.

Violence and coercion.

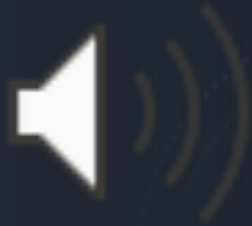

Adjustment.

Prejudice

Household or
family adversity.

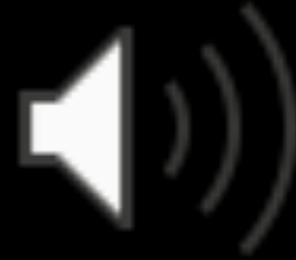

Inhumane treatment.

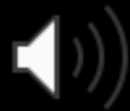

Adult responsibilities

- Bereavement and survivorship.

How do ACE's impact the lives of young people?

- In 2016 Public Health Wales published a study about ACE's.

47%

- Of people in Wales had experienced at least 1 ACE's.

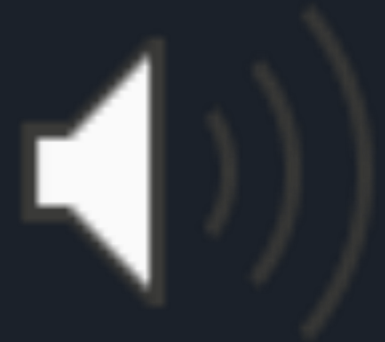

Separation or divorce
of parents counts as
an ACE's.

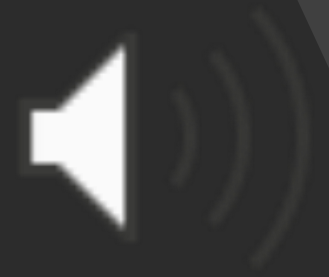

- People who have suffered ACE's are more likely to bring their children up with ACE's?

Public Health Wales are working to:

- Develop knowledge and skills
- Sharing evidence
- Spreading information
- Pulling learning
- Driving change

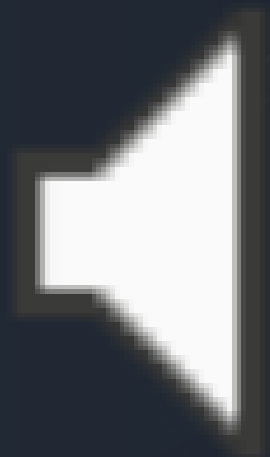

Qualitative Research.

- Conversations and interviews.

How can my
results help?

Promoting prevention in communities.
