

AS3 Mini-Presentation Peer Feedback

Practise part of your AS3 with a partner and give one clear, useful piece of feedback.

This is practice, not marking. You do not need a finished presentation. Use the option that matches where you are today.

Step 1 - Speaker chooses ONE practice option

- ☐ Option A: Present ONE skill and the reflection connected to it. If you are doing two skills in AS3, choose just one for this practice.
- ☐ Option B: Present your current ideas for ONE skill, even if that section is not finished yet.

Speaker: Aim for about 2-3 minutes. You may use notes. Try not to read every word. If you are nearly finished, you can continue for a little longer if your partner agrees.

Step 2 - Partner listens and checks what they hear

Tick only what you actually hear. It is completely fine if some boxes are not ticked yet - that tells the speaker what to work on next.

- ☐ The skill is clear.
- ☐ There is a specific example from the module.
- ☐ The speaker explains what they learned or what changed.
- ☐ A challenge or difficulty is explained.
- ☐ The speaker explains how they improved or could improve.
- ☐ The speaker connects the skill to future study and/or work.
- ☐ The ideas are in a clear order.
- ☐ The speaker is understandable and not reading every word.

Step 3 - Give structured feedback

Choose ONE strength and ONE next step. Be specific. Do not try to rewrite your partner's presentation for them.

<i>ONE thing that was clear or effective:</i>
<i>ONE thing to develop next:</i>
<i>A specific suggestion that could help:</i>

Helpful feedback prompts

- “Your example was clear because...”
- “I understood what you learned when you said...”
- “One part that could be more specific is...”
- “You could explain more about...”
- “The next thing I would work on is...”

Step 4 - Speaker chooses an action

Listen to the feedback. You do not have to use every suggestion. Choose the one action that will help your AS3 most.

The change I will make after this practice is:

Step 5 - Swap roles

- ☐ Speaker becomes listener.
- ☐ Repeat the same process for your partner.

Kind + specific + useful = good peer feedback
