Benefits and drawbacks of T1 &T2 hypervisor, Cloud Computing discussed. DNS and AD Critical roles could have been discussed elaborately. The figure for DNS needs more detailed description. Some of your description clearly states the lack of literature review. Eg. Description on Ping. More terminologies could have been discussed. It is not required for you to practically work on each terminologies in different OS'es to describe them. Reviewing literatures and understanding the terms and its use on the existing worksheet could give you an idea about the purpose. Quality of the work needs improvement. Could have added chapter numbers, sub heading for the observations made.	11.3
