Blackbird in short

- Plug & play IoT HW with SaaS model
- AWS IoT Cloud structure
- +200 million data entries pr. day
- +200 customers in more than 27 countries
- Application comes in 21 language
- Largest customer +460 lines
- HQ in Copenhagen, Denmark
- Newly opened office in the US

SELECTED GLOBAL PARTNERS

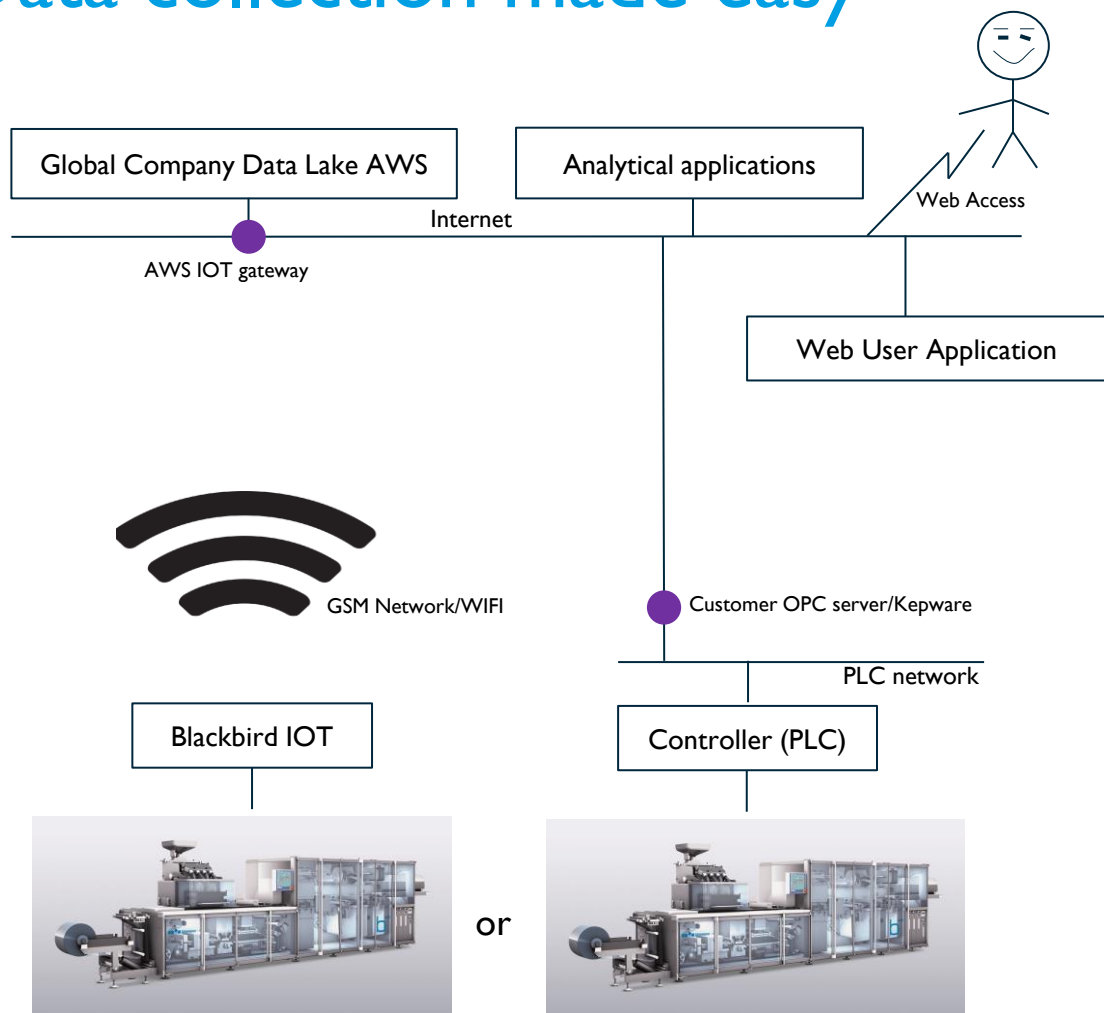

Setting the scene

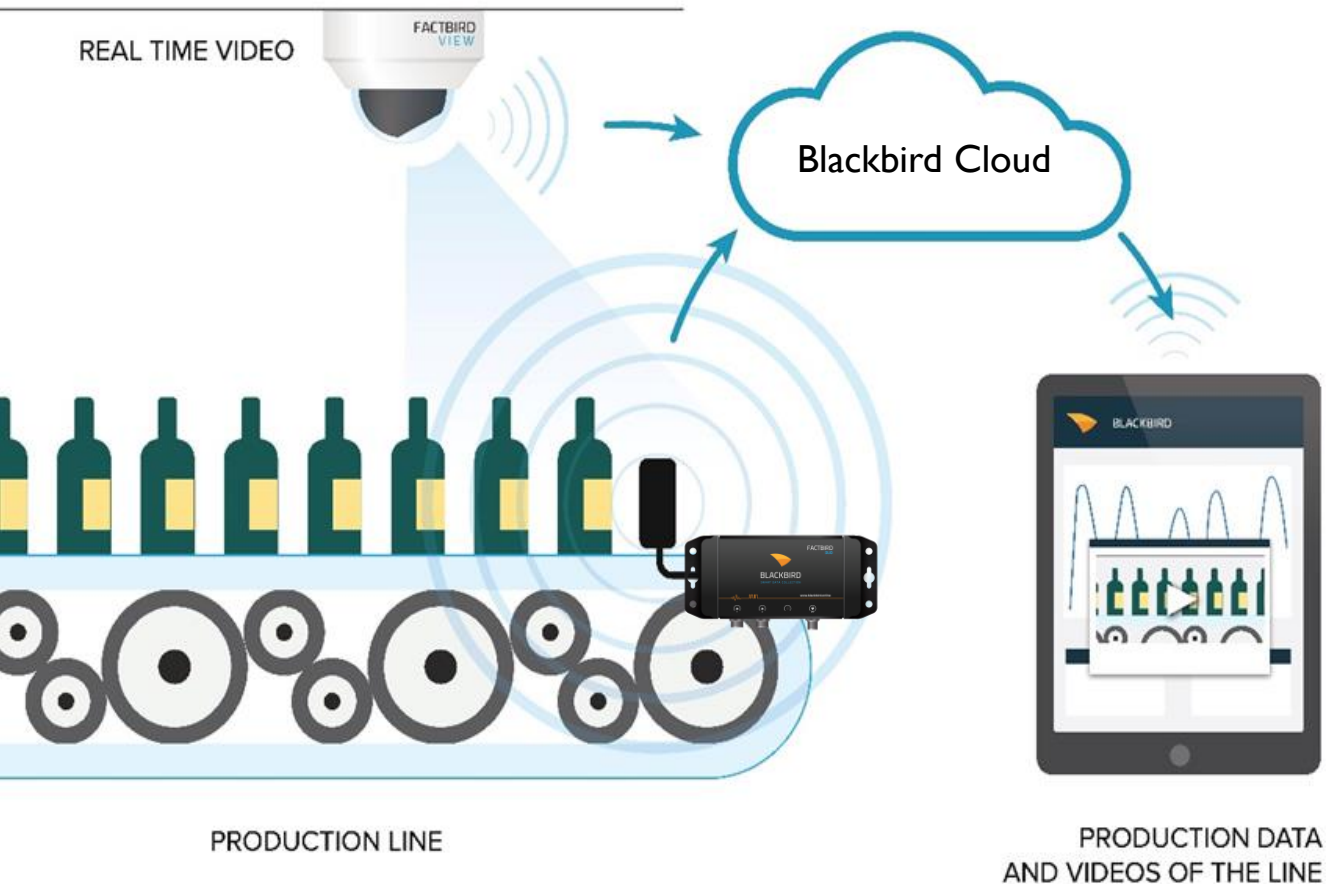

- Production-data collection is difficult
- Requires complex IT infrastructure
- High level of technical expertise is needed
- 65% of production processes are not connected
- Data is existing but inaccessible

Data collection made easy

In short

- Fast implementation
- Performance measurement
- Downtime analysis
- OEE calculations
- Process monitoring
- Environmental measurements
- Available everywhere

"Great system with fantastic customer support"

Overall: From the time we made the first call, they have been extremely supportive to our needs, their team has even helped us set up custom reporting that we use in our daily production meeting. They have always been prompt in responding to our needs and this system has helped improve our OEEs on our lines by focusing on the issues driven by real data.

Pros: Very easy to implement Customer serviceConstantly improving system and features

Cons: No mobile app.

Reasons for Choosing Blackbird: For the cost and most importantly the support that we received, Blackbird was clearly the better choice for us. There are a lot of systems out there, but for me the support that we receive before and after is extremely important and is a bonus to a already powerful system.

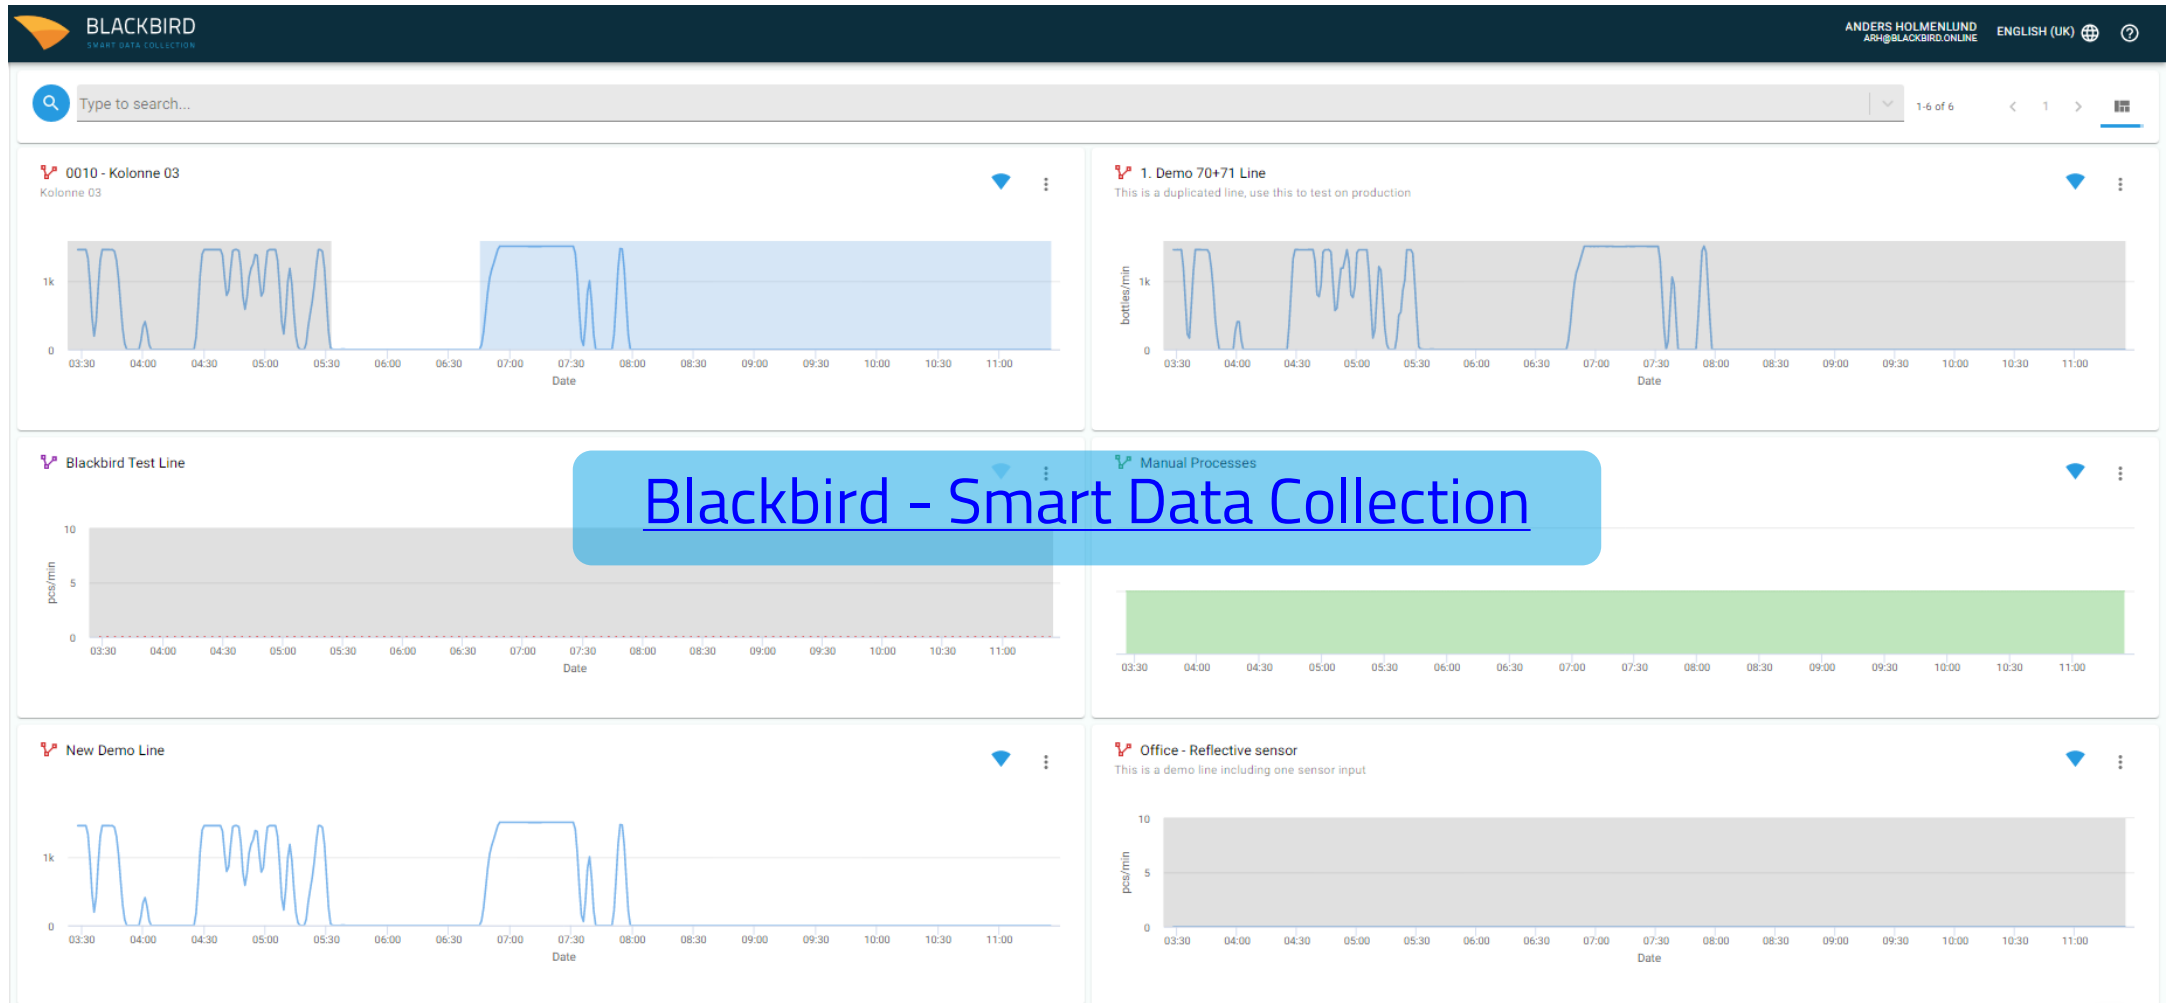

Richard Phipps
Operations Manager

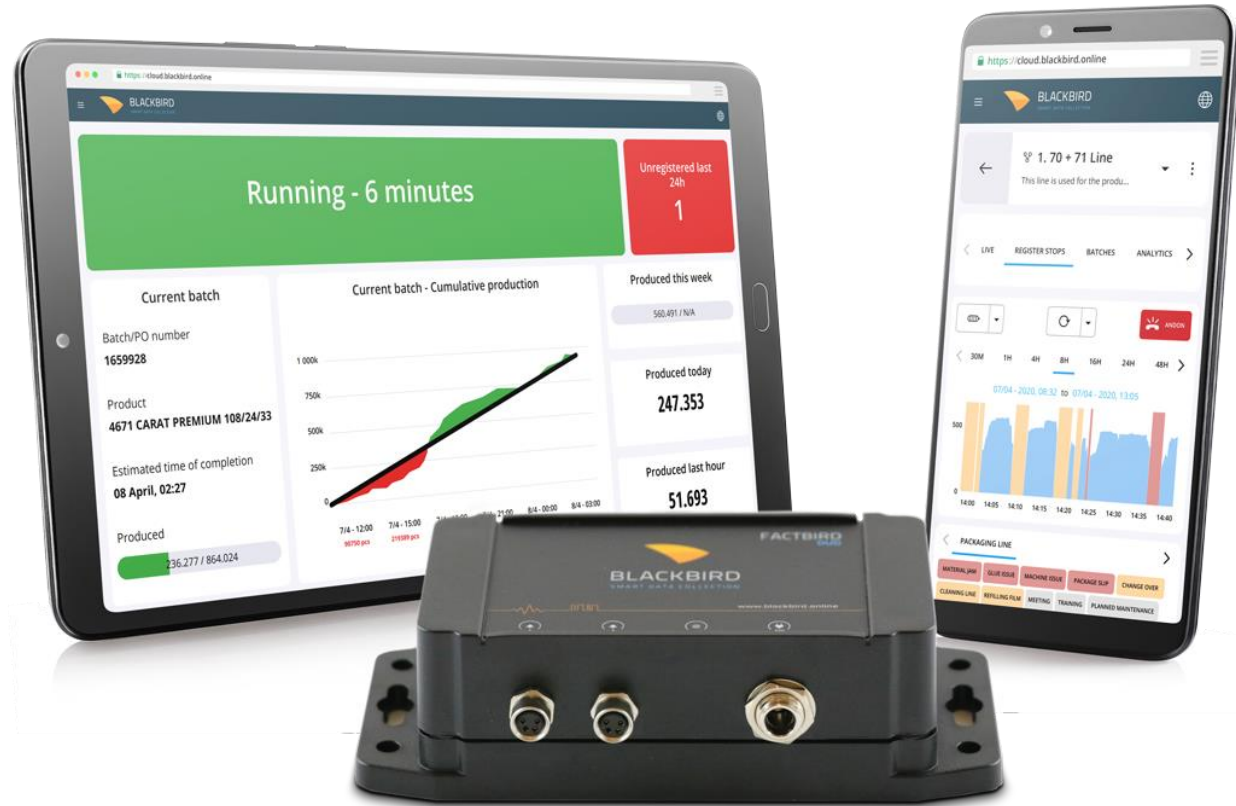

"One of the best pieces of kit I have used. I liked the ease of use and plug and play set-up..... The trial allowed us to test the product before purchase enabling us to see the real benefits and value of the system before payment."
