

# Everything You Need to Know

Between the period 03/01/20-07/02/20 73,756 people died , however next year between 08/01/21 - 12/02/21 105,463 people died that is a 30% increase from the previous year

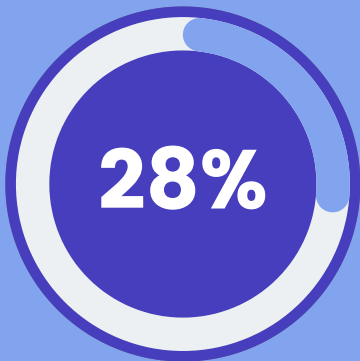

**"All countries need to review their strategies now."**

Dr. Michael J. Ryan, WHO Informal Advisory Group, March 2020

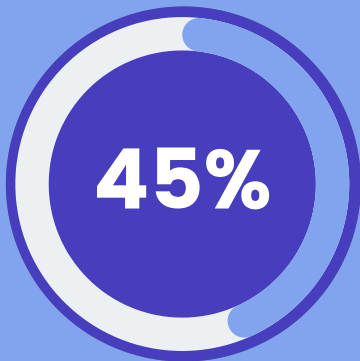

Male deaths aged 75-79 in 2020 between the period of 06/03/20-10/04/20 are 5,778 however in 2021 in the period between 12/03/21-16/04/21 the male deaths aged 75-79 decreased 4,157 which is giving us 28% less deaths then the previous year.

Female deaths aged 85-89 in 2020 between the period of 03/01/2020 -31/01/2020 are 5430 next year in 2021 the number of deaths for the period of 08/01/2021 -05/02/21 it's increased to 7,876 female deaths aged between 85-89 that is a 45% increase than the previous year.

MALE DEATHS

Part of the 75 to 79 male age group

FEMALE DEATHS

Part of the 85 to 89 female age group

The "panic-then-forget" cycle must be stopped. Instead, a "whole-of-society" approach must be adopted. It is imperative that the the International Health Regulations (IHR) be implemented in countries of all income levels.

Every country should do everything to follow through on prioritizing, funding, and implementing preparedness interventions.
