1) Requirements:

- water light
 - recyclable
 - expiration date
 - wear resistance
 - taste retention
 - non-toxic
 - durability
 - cheap
 - light
 - non-reactive to any ingredient of the food.
- printable

The best option would be recycled plastic which can be recycled again. Paper bag could be another option however they won't be durable even they include some kind of plastic film inside.

The ^{best} ~~most~~ environmental option would be if these snacks were stored in containers in the shops and the customers would take their own containers, paper bags etc to buy them
