

Job Title: 12 Month Industrial Placement- Engineering
Location: Banbury
Start Date: August 2018
Salary: £16,500

Prodrive Motorsport – Undergraduate 12-month Industrial Placement Opportunity

At Prodrive we like to challenge convention and we know what it takes to win. By combining our motorsport ethos with free thinking we create innovative and world leading designs, products and programmes which inspire our customers to fulfil their ambitions on the track and off-road. We also happen to make championship-winning race and rally cars.

We currently have major new-car programmes both on the track and off-road with RallyX and are looking for talented engineers to join our engineering team on placement from Summer 2018. Having won the GTE World Endurance Championship in 2016 and Le Mans in 2017, winning is what we are accustomed to and these placement opportunities will provide you with the opportunity of working alongside some of the best motorsport engineers in the world.

We have opportunities in the following areas:

1. Engine Design Engineer
2. Chassis Design Engineer
3. Customer Support Engineer

If you want to make a real difference on your year out, if you want to become part of a winning team and if you want to build a fantastic foundation ahead of a career in motorsport we'd love to hear from you.
