SECTION J: Data Protection and Storage

	Does the research activity involve personal data (as defined by the General Data Protection Regulation 2016 “GDPR” and the Data Protection Act 2018 “DPA”)?	YES	NO
1	<i>“Personal data” means any information relating to an identified or identifiable natural person (‘data subject’). An identifiable natural person is one who can be identified, directly or indirectly, in particular by reference to an identifier such as a name, an identification number, location data, an online identifier or to one or more factors specific to the physical, physiological, genetic, mental, economic, cultural or social identity of that natural person. Any video or audio recordings of participants is considered to be personal data.</i>	☒	☐
	If YES, provide a description of the data and explain why this data needs to be collected:		
2	The information will be gathered and stored using Qualtrics, then transferred to SPSS and saved in a file. The file then will be secured with a password on both the file and the device where it is located. Qualtrics will not gather any identifiable information about individuals. The researcher and supervisor will have accessibility to the details and records throughout and after the study. All data will be erased after the research study is recorded and reviewed by the university exam board. <i>(this box should expand as you type)</i>		

DATA COLLECTION PROCEDURE

- Must guarantee that the methods they use are ethical, reliable, valid, and suitable for addressing their research questions and aims
- It is important for them to take into account considerations such as maintaining confidentiality of participants, obtaining informed consent, and ensuring data security throughout the data gathering process.

Study Debrief Sheet

The correlation between social support network and adaptability: A Comparison between United Kingdom & International Students

Thank you for taking part in the study.

This study aimed to explore the relationship between social support network and adaptability among United Kingdom and International students. We specifically wanted to find out whether students' social support network is connected to their adaptability.

If you wish to **withdraw your data from the study**, please close your browser at any point of time, or if you have submitted it, as a reminder, after this point all of your data will be anonymised and we will not be able to trace it back to you.
