Comments:

A good presentation, nervous at start and then improved as presentation went on. The discussion on lit. review findings has to be bit more and in detail, justify methodology and techniques used in the project.

Discussed initial idea of practical setup and experiment. Bit more research is need to fully understand how attack/ measures can be implemented.

Show Contt chart in full screen.

Answered all questions confidently & clearly.

Overall a good presentation, just do bit practice to start well.
