<https://sway.cloud.microsoft/Giv2U64Agk6heZGa#content=qFclfubxqmsa4T>

exploring around my campus and seeing the bees at work woke my inner child as i was now sent to the past of seeing bees around my neighbourhood and also learning about pollination and cross pollination. Bees truly are a wonder to this world. How can we truly survive without them?

THE WONDERS OF FLOWERS AND THEIR INDIVIDUALITY

Rhododendron, how beautiful are your petals, from your daughters that have already bloomed in the spring, and your beautiful buds awaiting their spring. Your colours reflect the heart of your soul, scarlet, yellow and purple. Those that capture your beauty marvel at the sight of you. Rhododendron, there is none like you for you are one of a kind.

2 - Violet

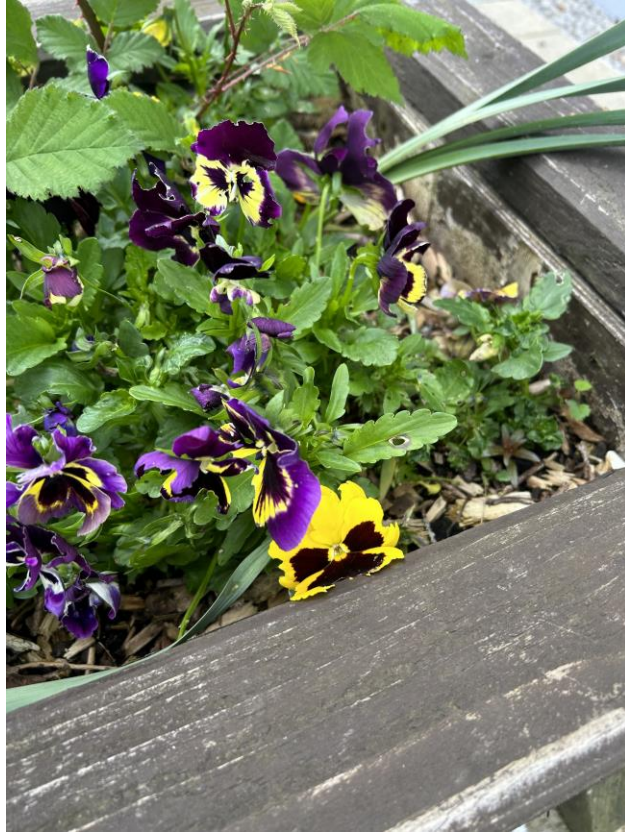

3 - Daisy

4 - Violet

5 - Violet

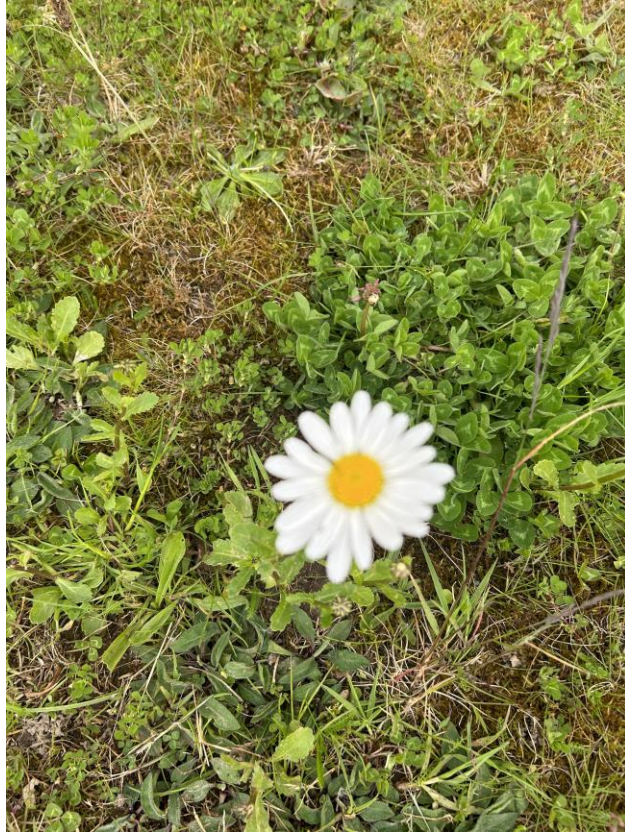

6 - Violet

7 - *Leucanthemum vulgare* also known as ox-eye daisy

8 - Stellaria

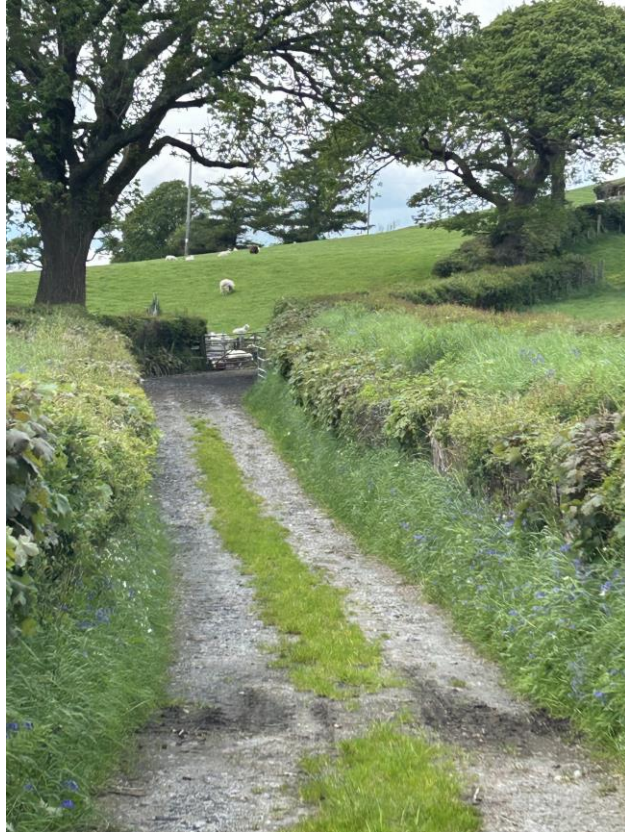

9 - Leucanthemum vulgare also known as ox-eye daisy

MY DISCOVERIES AND EXPLORATION AROUND LAMPETER TOWN

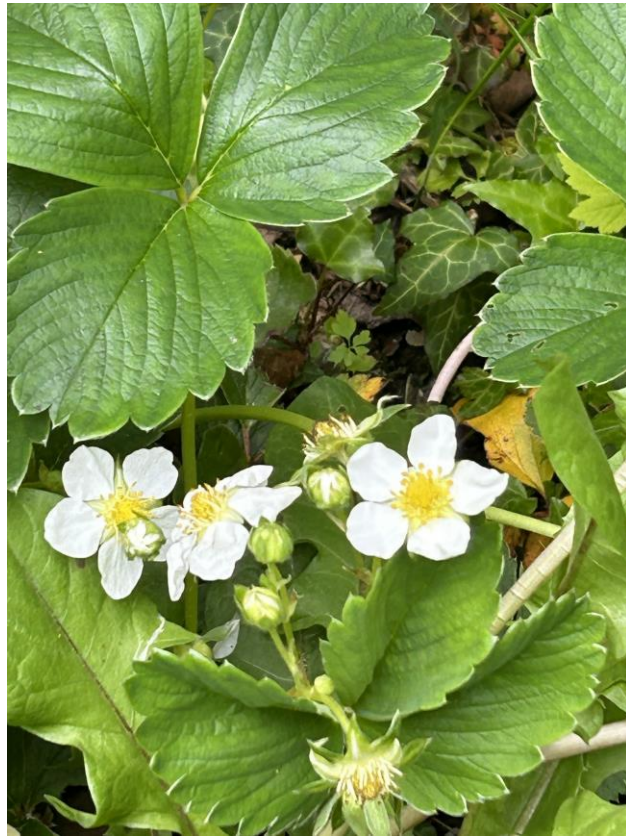

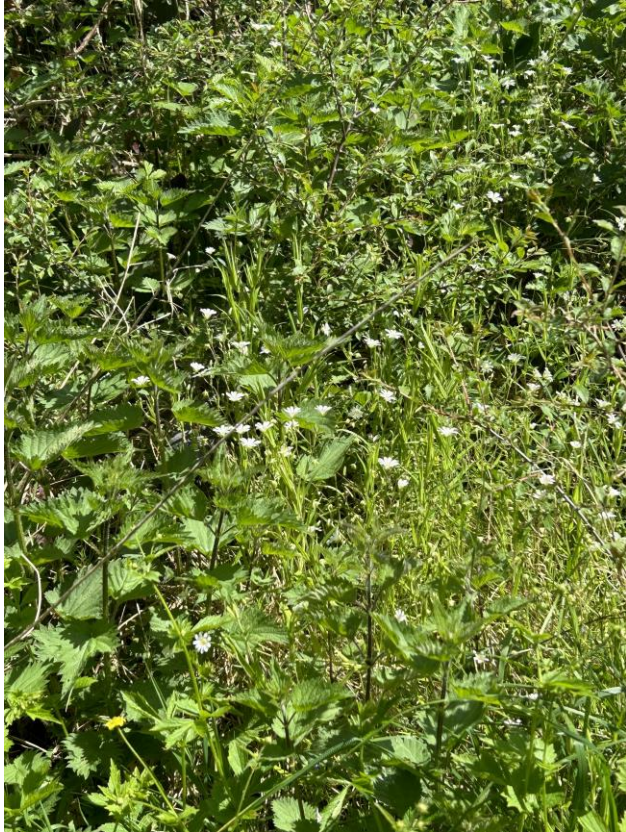

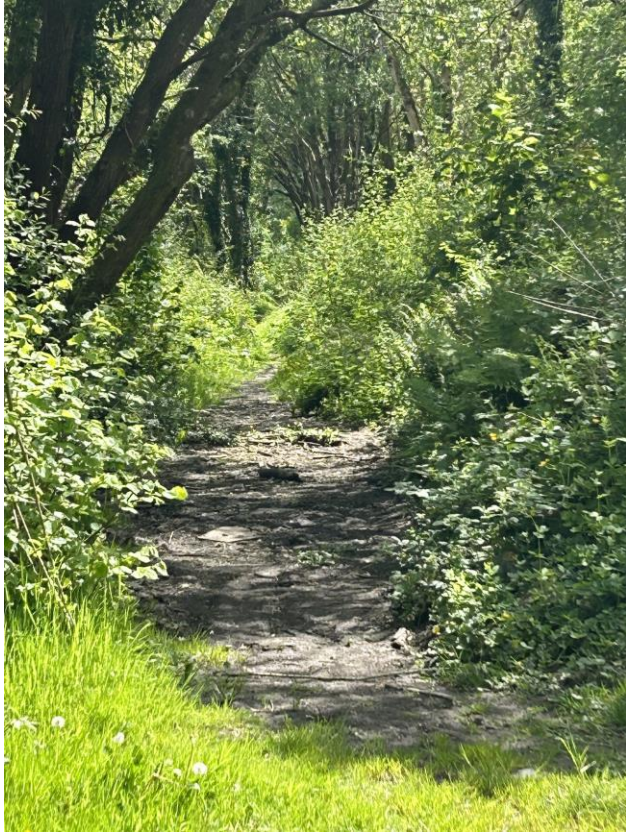

<https://sway.cloud.microsoft/Gjv2U64Agk6heZGa#content=qrBzFISCcHE03s>

The beauty of a town can only be recognized with eyes that are ready to see every detail and wonder, from the animals to the wonders of the sky, i have not realised the true beauty this town holds. The wonders of nature truly are a sight to behold.

Walking through, this nature path was very freeing, for once my mind was clear, hearing the chirping of birds and feeling the nearing summer sun, this experience is one that will forever stick with me.

LAMPETER CAMPUS

<https://sway.cloud.microsoft/Gjv2U64Aqk6heZGa#content=dAUdR5hpxpYEPQ>

<https://sway.cloud.microsoft/Gjv2U64Aqk6heZGa#content=zIP9PPMRkHXNGK>

<https://sway.cloud.microsoft/Gjv2U64Aqk6heZGa#content=YmmKbgAA7JAE43>

There is a saying that quotes "early birds catches the first worm". Capturing the birds around campus was a bit challenging but seeing them in their natural habitat is very inspiring.

A home, to some it's a warm place that enriches your soul, while to some they have to build it with all their might and these lovely homes stands beautifully in the cascading sky. I can only imagine the view from above.

What you can find on a wellbeing walk around Lampeter campus

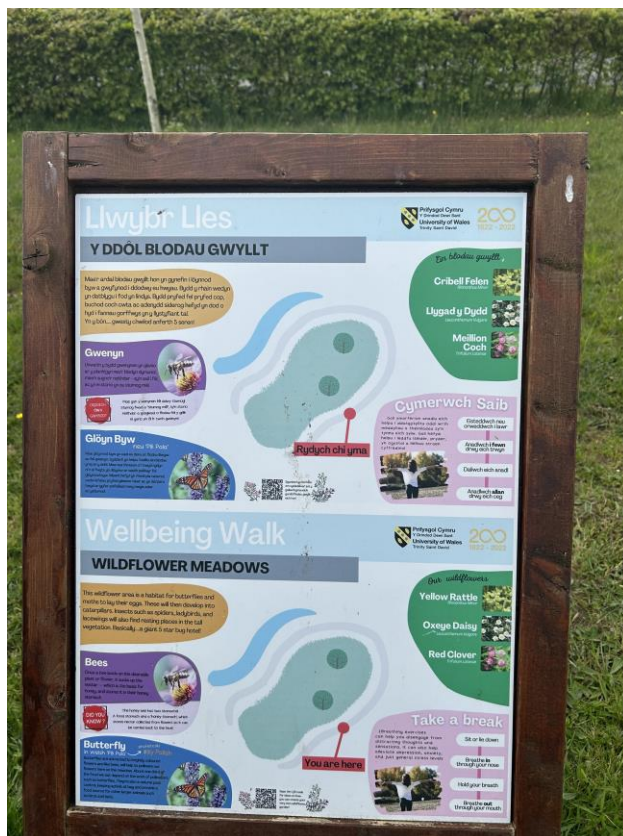

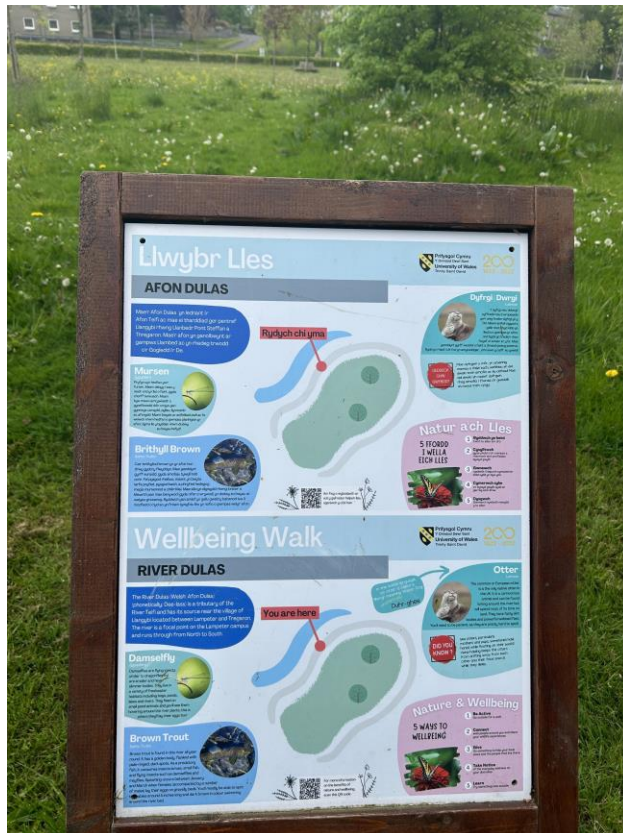

CONSERVE

This John Muir award experience truly has highlighted a key aspect of preserving our natural habitat. This has made me hyper aware of my role as a global citizen and what i can do to help conserve the areas i explored. Upon arriving to Lampeter campus I realised the vastness of green lands and beautiful flowers, especially during spring, working alongside my school, there has been signs set up to show no mowing areas which helps conserve and promote more bees around campus and also other flowers to bloom. Another aspect which i highlighted in this scrapbook is the birds that are around the campus. The school has already set up bird houses to help the birds and with the knowledge i acquired from my sustainability module to help feed and protect our wildlife, i set out a homemade bird feeder which naturally allows the birds to feed freely.
