Module Code: LCHS4001-BIRM

Module: Academic and Employability Skills

Lecturer: Dr. Emmanuel Asante

Submitted on: 05 July 2026

Section	Your response (Use your own words!)
1. Research	The role i had searched was radiologist. I searched this through google scholar. It was quite difficult initially to find it but later i could find it. The role i found had posting date, job description and salary. Initially, i thought it would be difficult but when used google scholar, it was quite useful and found everything quite clear.
2. Presenting	During my presentation, i talked about my role and why i chose this role. I also said how i searched for this role on the google

	scholar. I was initially anxious but could manage to talk about my search confidently. I also used the CRAAP test while doing this for my role. I found the date, publishing agency, job description and other relevant information was accurate.
3. Challenges you faced with your presentation	I was not familiar with the search of any job role. I did not know how to do it initially. later, when i attended the class with the lecturer, it was explained how to use the google scholar and other searching websites to find the role of radiologist. I was very nervous but when i stand behind the screen, i saw my written text and i could read and explain that.
4. Actions to improve	I have to prepare as early as possible. This experience taught me how timely and early preparation is essential. I will do everything based on an action plan which i am sure will help me to do my task successfully and timely.
5. Further steps needed to Prepare for Task 3	For task3, I have to use academic websites such as google scholar and other websites such as NHS. I am sure this will help me to find more job roles as a radiologist with all relevant information. I also experience of CRAAP test which will help me to evaluate my work successfully.
