

How to Insert a Hyperlink in PowerPoint

Hyperlinks connect documents on the internet, enabling navigation between pages with a single click.

- A **hyperlink** is a **guide element** or a **reference** in a hypertext document that directly access another section or another hypertext document on a different domain.
- Using **hyperlinks** in a presentation is adding an expert touch to your work, making the audience more engaged.
- For presentations to be effective, simplicity and clarity are crucial. You may add extra information without making things cluttered by using **hyperlinks**.

Change the **color** of a hyperlink:

- Right-click and select **Edit Link**.
- Set** the **hyperlink** you want to re-color.
- On the **Home** Tab select down arrow next to the **Font Color** button
- Open** the menu of color.
- Set** the **color** you want for the hyperlink.
