Cert HE Construction, Digital, Computing & Engineering

Technical Skills Development

INTRODUCTION

What I have learned over the last few weeks from these lessons is about the Health and Safety, Legislations, Risk Management, Risk Assessment, Prosecution, Water Puzzle Thieves, Velocity & Time Excel. This also allows as to see how it functions. The purpose of this induction is to ensure that everyone on the premises understands their responsibilities when it comes to maintaining a safe working environment. Ensuring that all employees, employers, and visitors are safe and aware of these important health and safety topics. Organizations can create a safer and healthier work environment, reducing the risk of accidents and injuries. By prioritizing health and safety in any given environment, employers and individuals can prevent accidents, reduce injuries, and promote a safe and healthy work and living environment. This benefits not only the individuals involved but also the organization, by increasing productivity, reducing costs associated with accidents and injuries, and improving morale and job satisfaction and ultimately improve the bottom line by reducing costs associated with fatal accidents and injuries.

ACTIVITY WEEK	ACTIVITY	KEY LEARNING POINTS	KEY BENEFITS/VALUE ADDED	FURTHER COMMENTS AND HOW CAN I IMPROVE IT IN FUTURE?
WEEK ONE	INTRODUCTION TO HEALTH AND SAFETY	Good health practices and addressing any health issues that may arise in the workplace or environment.	Implementing effective health and safety measures in any given environment. CONCLUSION

The Health and Safety are essential aspects of our lives that must be taken seriously to ensure a healthy and productive society. It is important to prioritize our physical, mental, and emotional well-being, as well as the safety of our environment, workplaces, and communities. We can achieve this by following best practices, regulations, and guidelines established by experts and regulatory bodies in various fields. It is also important to educate ourselves and those around us about potential risks and hazards and how to prevent and mitigate them. By prioritizing health and safety, we can create a healthier, safer, and more prosperous world for ourselves and future generations.
